

My name is Anuja Jeevan and I hail from the state of Kerala. I would like to pursue a 2 - year postgraduate programme in Master's in Management at University of Presov. I believe that this program would help me to a solid foundation in business and helps me to acquire various business skills

I started my schooling in St Agnes high school, Then I graduated my 12th grade from St George English Medium higher secondary school which is under the board of higher secondary education, Kerala. I hold a bachelor's degree in Business Administration the Mahatma Gandhi University, Kerala.

The decision that I made for choosing Europe is because it is a place where every field is advanced with modern technologies and equipment. The teaching method is also much different from India in terms of practical learning and assignments. Finally I have decided to choose Slovakia as a place to set my future.

Slovakia is a country in Central Europe with its capital Bratislava. Slovakia is one of the excellent higher education providers in Europe. The country offers affordable study programmes, better academic institutions, high quality Life and so on. Slovakia is a safe and uncrowded country. Studying in Slovakia will give exposure to international students across the globe. Moreover, Slovakia welcomes international students and offers programmes in English to cater their needs.

There are some prominent universities in Slovakia, among them, I had chosen the University of Presov due to its academic excellence and the study programmes are designed as per the needs of the market, trends and profession of the future. I would like to pursue a Masters degree in Management from the University of Presov because the programme focuses on providing knowledge and skills needed to start, manage and grow business. It combines elements of entrepreneurship, business management, and leadership. Moreover, I am very much fascinated to become an entrepreneur by starting my own business. So I firmly believe that studying this programme would help to learn about innovation, finance, marketing, strategies which all are relevant while doing a business.

My prime educational goal is to stay abreast with the latest development in the business world.

A pragmatic approach to education makes the learning process effective. This is the very reason I have decided to pursue the program from one of the leading university in Slovakia. My aim is to engage myself in inter-cultural exchange between the professionals from other nations and enhance my skills.

After graduation I will return to my home country and start my own business. We have a family business and I would like to implement the ideas and skills that I acquired from the course for boosting and expanding my business and thereby I wish to be a successful entrepreneur.
