

Statement of purpose

NAME: MUHAMMED ALI

COURSE: Aerospace technology

I believe that aviation is quite demanding and challenging career. Still, I feel that the reward would be amazing and i am extremely ready to pursue this career. I look forward to applying my technological knowledge and skills in my future career in the air travel industry. Another reason I have chosen this career path is that it will enable me to make use of my strong interpersonal skills. I love meeting new people and am able to communicate with a wide range of individuals

I am glad to introduce myself as Mr.MUHAMMED ALI as Indian, born on 7th of January 2005 , at kerala, in the State of India and livea in kerala. I have completed my highscool education from MAM MODEL SCHOOL, CHAVARCODE in the year 2023 with 74% mark at commerce stream in 2023 i studied german language till A2 level My family comprises of my father Salim Shareef. Who is an business man. My mother thajuniza.s, a house wife I have two sisters named Hajira.s, Ayisha.s hajira is elder than me she is bba student in manipal university and Ayisha is younger than me studying in 10th grade

The technical role requires you to work in pressurized environment. I naturally have calm nature and i will not be put off by stressful situations whereby have to perform under pressure i can handle the stress of job because I believe I am a stornng communicator who has the confidence in my own abilities. I believe that choosing loved course and studing the respect of subject matter, the level of expertise and knowledge the lecture have, and the widercommunication and interpersonal skills i will gain, make it my number one choice

Slovakia is the best destination to pursue my higher education. The education system offers unique specialization courses that are available only parts of the world. The qualifications acquired from education Institution in Slovakia hold international importance and are acceptable around the world. A part from the quality of education, multiculturalism which is an important feature of country provides exposure to various cultures across the world and inculcates tolerance among students. We can enjoy the excellent quality of life, especially with cost of living which is lower than other countries. High standards of education and conducive environment are the reasons for my decision to study in Slovakia

I just heard about the university, which is Technical University of Kosice Slovakia (TUKE) which is on of the top ranking University in the world and top University in Slovakia.

I wish to study in Technical University of Kosice(TUKE) as the university of my graduation. The 3 year program bachelor of Aerospace technology is taken in English, I think I will be more helpful in the future. The fee structure of this program is also reasonable. If I study Aerospace technology in India I won't get good practice and education but I believe that I will get better quality teaching, more practical experience and training at this university. This is the best university in Slovakia I think TUKE would provide all facilities that students need, and all students look forward to it

I state that the particulars mentioned above are true and correct in every detail and I am well-known about the rules and regulations of the Slovakia Government that I must follow during my stay as an international student. I believe that I am a genuine student
