Recommendation letter

I am pleased to recommend Mr. Jovash Joekutty Iype E as a prospective student for the graduate program. I have known Jovash for the past 4 years as an undergraduate student of Civil Engineering at the college and had many opportunities to observe him from close quarters. I was his instructor for the courses Advanced Concrete Technology and Quantity Surveying & Valuation.

I have come across Jovash as an ambitious and career driven student and has observed that he works hard to achieve his goals and is committed to his task on hand and assignments. I have noticed in him an emotionally mature, confident and good natured individual. He is very participative in the class and has the ability to put his thoughts across with ease. He possesses a good analytical abilities and an acute sense of reasoning to analyze problems and often manages to come out with relevant solutions. I have found him to be fairly self-reliant with a high level of self-confidence.

Mr. Jovash's deep understanding of the subject, as well as his quest for knowledge has impressed me on more than one occasion. He has repeatedly proved his conceptual ability and creative outlook in the classroom debates and exhibited novel solutions to problem. He has good presentation skills too, which was evident during his seminar presentations on "Urban waste water-A viable means of irrigation" during the final year of his course. His project on "Subgrade stabilization of soil using nano modified jute fibers" was also well executed and was appreciated by the faculties. He also possesses a flair for keeping himself abreast with latest developments in technology.

Jovash's competence and skill was amply demonstrated through his performance in academic as well as cocurricular activities organized by the institution. His excellent organizational skills too were displayed when he was selected as the Coordinator of the Annual national level techno-cultural festival 2018. Jovash also participated in several workshops held at the college such as Training on Non Destructive testing in construction and Workshop on Vaastu shastra (Indian traditional science of architecture) as part of the academic curriculum.

Overall I have no hesitation in rating him among the top performers of my batch. I am confident that he will continue to excel in his higher studies at your esteemed university and I wish him all the best in his future endeavors.

Sincerely,

Prof. Dhaniesh J Danam, BE, ME, AMIE.
