LETTER OF RECOMMENDATION

I write this letter of recommendation in favour of Mr. Jovash Joekutty Iype E. Jovash has been a student of my B-Tech classes for the academic period 2014 to 2018. Over these years I have taught him the subjects of Design of Steel Structures-1 and Design of Steel Structures-2 across various semesters. I can say with confidence that Jovash has distinguished himself as both a capable and conscientious student.

Throughout my career I have encountered many dedicated students. Few students, however, demonstrate the capacity for truly creative thought. On the basis of his performance in my classes, I have no hesitation in placing Jovash among the list of those few selected ones. His academic ability is first-rate. He displays impressive logical thinking abilities and an intellectual curiosity much superior to that of his peers. He was always an active participant in my sessions and an eager listener who never hesitated to raise questions.

Specifically, as regards his application for the Master's degree Courses, I note that he has a strong academic background, inherent passion for the subject and necessary quantitative skills to support his claim for an admission. Because of his drive and ambition, I am confident that he will continue to remain at the top of his class and display excellent academic performance. Although he is very serious and motivated in his pursuit of knowledge, he is also a very humble, down to earth person who is willing to listen to other ideas and appreciate others point of view.

Jovash also has a wealth of practical experience. Having done quite a few projects and participated in many technical events, I believe that through this masters, apart from higher knowledge level, he can bring a unique viewpoint, if combined with an awareness and exposure to the international world. In addition to all these, I notice that he possesses the qualities of being a good natural leader and an ideal team member.

I feel that he has the requisite intellectual skills, work ethic, determination and commitment to succeed at whatever he chose to pursue. I am sure that his hard work, determination and accomplishments till date, is a clear indication that he will accomplish whatever objectives he sets for himself. I wish him all the very best for his career ahead and hope he will be considered for admission to the concerned university.

Dr. Manoj Nallanathel (M-Tech, PHD,
C. Engr), HOD/ Department of Civil
Engineering, MBCET-Peermade-
Kerala-India.
