

JOVASH JOEKUTTY IYPE E

Site Engineer / QS Engineer

Dedicated and skilled Quantity Surveyor Engineer with 5 years of experience in the construction industry. Proficient in cost estimation, procurement, contract management, and project coordination. Adept at analyzing project requirements and ensuring adherence to budgetary constraints while maintaining high-quality standards. Proven ability to work collaboratively with cross-functional teams and manage multiple projects simultaneously. Demonstrated expertise in conducting thorough quantity take-offs, cost analysis, and value engineering to optimize project outcomes. Strong knowledge of industry regulations, building codes, and construction methodologies. Seeking to leverage my expertise and drive for excellence in a dynamic and challenging construction environment.

KEY SKILLS

- Project Engineering
- Site Supervision
- Quantity Surveying
- Inspection
- Civil Construction
- BOQ Preparation
- Estimation
- Documentation Skill
- Civil Project Management
- Analytical Skills
- Rate Analysis
- Product Testing

EXPERIENCE

❖ QUANTITY SURVEYOR G.R Constructions

01.09.2021 – 05.01.2024

KEY RESPONSIBILITIES

- Prepare accurate and comprehensive cost estimates for projects, taking into account materials, labor, equipment, and other project-related expenses.
- Implement effective project control measures, monitor project progress, and identify potential deviations from the budget.
- Conduct detailed rate analysis for materials, labor, and services to ensure competitive pricing and adherence to industry standards.
- Regularly monitor project expenditures and assess their impact on the overall budget. Proactively identify cost-saving opportunities without compromising quality.
- Prepare clear and detailed Bills of Quantities (BOQ) for projects, including all necessary measurements and specifications.
- Collaborate with project teams to create and manage project schedules, ensuring that deadlines are met and resources are utilized efficiently.

❖ SITE ENGINEER Aaron Constructions

01.01.2021 – 15.08.2021

KEY RESPONSIBILITIES

- To coordinate for procurement, check and inspect all the material bought on site for construction as per approved material list.
- Day to day complete supervision as per the consultant's recommendations & drawings and control over the workmanship of different vendors and agencies connected with our project.
- Onsite coordination with consultant's representative, client and different vendors.
- To ensure quality of the work with safety at site.
- To take all the measurements and quantities required for the running bills of the project.
- Examine and be thoroughly familiar with the drawings, specifications, Bar charts etc. to carry out the daily activities.

PASSPORT DETAILS

Passport No	U2027410
Place of Issue	Cochin
Date of Issue	22.01.2020
Date of Expiry	21.01.2030

INTERESTS

Reading

Song

Driving

- Anticipate work to be put in hand, and endeavor to ensure that all necessary drawings and information are available at the site when required.
- To maintain records for all the activities done on site with the checklist and plan for upcoming site activities.
- To identify and carry out the sequence of activities as per the approved method statements.
- To maintain and send daily activity reports to Sr. Engineer/ Manager.
- Should be aware of BBS & Quantity estimation.
- Should have sound knowledge of Waterproofing & Structural repair work.

❖ JUNIOR ENGINEER

Venus Homes

03.12.2018 – 14.12.2020

KEY RESPONSIBILITIES

- Under the supervision of senior engineers and support them in various tasks, including conducting research, data gathering, and assisting with project planning.
- Testing and analysis of construction materials to ensure they meet quality standards and are suitable for the intended use.
- Help Senior Engineers in estimating the quantities of materials required for construction projects, which is crucial for budgeting and procurement purposes.
- Participate in site visits and inspections to assess the progress of construction projects, ensure adherence to specifications, and identify any potential issues or challenges.
- To assist quality team & safety team to ensure quality of work with safety.
- To perform such other functions as may be directed to ensure quality of the work and fulfillment of Architects and other consultants assignments.
- Monitoring project costs and helping to identify cost-saving opportunities without compromising quality.
- Maintaining accurate and detailed records of project progress, changes, and communication is essential.
- Aware of and adhere to environmental regulations and safety standards related to construction activities.
- Stay updated on the latest developments in civil engineering and participate in professional development opportunities to enhance their skills and knowledge.
- In collaboration with senior engineers, identify and address technical challenges and find solutions to engineering problems that may arise during the construction process.
