

### GENERAL MEDICAL CERTIFICATE

**Legal name** (written exactly as it appears in passport)

First/given name: PRINCESS AMIAH GWYNETH

Family/surname: POSETE

Permanent home address: BRGY BURUBOR, UPPER MAGAPIT, CAGAYAN VALLEY, PH  
TUGUEGARAO CITY, PHILIPPINES

Date and place of birth (dd/mm/yyyy) 06/10/2005

**The patient mentioned above is at present free from infectious diseases and is in good physical and mental condition. There are no medical objections to a stay as a student abroad.**

Please, circle the appropriate answer below	Examination date*	Result
<b>AIDS*</b> : (HIV infection can only be detected after 3 months) Please, attach HIV serologic test result.	24 April 2024	<u>negative</u> positive
<b>Hepatitis-B*</b> : Please, attach the copy of your vaccination card / in the lack of vaccination card, documentation about your antibody protection.	24 April 2024	card attached/protection level: IU/l
<b>Hepatitis-B*</b> : (HBV infection can only be detected after 3 months) Please, attach HBV serologic test result.	24 April 2024	<u>negative</u> positive
<b>Hepatitis-C*</b> : (HCV infection can only be detected after 3 months) Please, attach HCV serologic test result.	24 April 2024	<u>negative</u> positive
<b>Chest X-ray</b> : Please, attach the chest's X-ray result (not the film) in English / Hungarian (not older than 3 months).	24 April 2024	<u>negative</u> positive

*\*Please note: tests have to be taken within a year!*

#### Remarks:

Any chronic diseases the patient is being treated for: none

Special needs: none

NAME AND ADDRESS OF THE DOCTOR:

VICENTE WINSTON BILLENA

PLACE AND DATE:

PRIME MEDICAL CENTER, IBRI HOUSE, SHEIKH ZAYED  
AL QADZ, DUBAI

SIGNATURE AND STAMP OF THE DOCTOR:

27 APRIL 2024  
  
Dr. VICENTE WINSTON BILLENA  
General Practitioner  
Prime Medical Center (Sheikh Zayed Road) L.L.C.  
الدكتور فينسنت وينستون بيلينا  
طبيب ممارس عام  
License No. DVA-P-0230707

Please note: The University of Pécs reserves the right to repeat any of the examinations at the University of Pécs in Pécs, Hungary.

Investigation	Result	Unit	Biological Reference Intervals
---------------	--------	------	--------------------------------

**SEROLOGY**

**HIV 1 & 2 Antibodies & HIV antigen( p24)** : NON REACTIVE NON REACTIVE

*Chemiluminescent microparticle immunoassay (CMIA)*

\* A negative test result does not completely rule out the possibility of an infection with HIV. Serum or plasma samples from the very early (preseroconversion) phase or the late phase of HIV infection may occasionally yield negative findings. Yet unknown HIV variants can also lead to a negative HIV finding. The presence of HIV antigen or antibodies to HIV is not a diagnosis of AIDS.

**Hepatitis C Virus Antibodies** : NON REACTIVE NON REACTIVE

*Chemiluminescent microparticle immunoassay (CMIA)*

\*\* For diagnostic purposes, the results should always be assessed in conjunction with the patient's medical history, clinical examination and other findings. Due to a long time period from infection to seroconversion, negative anti HCV test results may occur during early infection. False negative results may also be seen if antibody concentration is below the detection limit of this assay

If acute hepatitis C infection is suspected, measuring of HCV RNA by reverse transcriptase polymerase chain reaction may give evidence of HCV infection. The detection of anti HCV antibodies indicates a present or past infection with hepatitis C virus, but does not differentiate between acute, chronic or resolved infection.

**Hepatitis B Surface Antigen (HBsAg)** : NON REACTIVE NON REACTIVE

*Chemiluminescent microparticle immunoassay (CMIA)*

\*\*\* According to the present state of knowledge, it can be assumed that available assays for the detection of HBsAg cannot identify all infected blood samples or persons. A negative test result does not exclude with certainty a possible exposure to or an infection with the hepatitis B virus. Negative test results obtained for persons with a past exposure may be caused by an antigen concentration below the detection limit of this assay or the lack of reactivity of the antigens to the antibodies used in this assay.

**\*\* End of Report \*\***

**DEPARTMENT OF RADIOLOGY AND IMAGING**

**Chest x-ray (PA view):**

**FINDINGS:**

- The lung fields are showing normal vasculature, with no consolidative patches or masses.
- Both costo-phrenic angles are free.
- The cardiac contours and size is normal.
- No mediastinal or hilar shadow.
- The bony thorax is unremarkable.
- The diaphragmatic outlines are smooth.

**IMPRESSION:**

- **Unremarkable study.**
