The Selection Committee,

RE: URVI KANJI BHUDIYA ADM NO.6888

I recommend Urvi Kanji Bhudiya for the university admissions offered by your prestigious institution. I got to know Urvi in year 12 when she approached my office for industrial internship in an engineering company. Urvi served the community service club known as LEO that I was in charge at that time in year 12 and year 13. She was also a member of the Kenya Red Cross and dedicated her free time to community service by attending camps and lessons held by the Kenya Red Cross service.

Urvi has always impressed me with her hard work, passion and determination. She always asked for help inside and outside class and never rests until everything is made clear to her. She is passionate about math, physics, chemistry and geography. One of her biggest dedication and commitment is to serve other students. She impressed me with her leadership and team work abilities especially assisting her classmates to understand basic science concepts. She is respectful and patient when it comes to discussions and group work.

Urvi chose engineering field as her career and she plans to specialize in aerospace engineering so that she can train other Kenyans on this rare skill that is not in the country. I do not have any doubts in my mind, that Urvi would succeed in her plans because of the determination that she puts on everything she starts and her commitment towards pursuing her career in aerospace engineering, to give back to her fellow Kenyans.

Regards,
