

LETTER OF RECOMMENDATION

Dear Admissions Team,

I am pleased to write this letter of recommendation for Parthiv Chakma and his application for the Master's program in your esteemed institute. I have been his professor and academic advisor for the last two years and had the opportunity to witness his academic and personal growth.

From the beginning of his undergraduate studies in Electrical and Computer Science engineering, he had a genuine interest and passion for programming and software development. His excellent academic record is evidence of this passion, being among the top students in his class. He has a remarkable ability to grasp complex programming concepts and apply them to real-world problems.

During his undergraduate program, he worked on various group projects that required teamwork, communication skills, and strong leadership abilities. He consistently demonstrated excellent problem-solving skills and his contributions were critical to the success of these projects.

He spent time outside of the classroom participating in workshops, conferences, and hackathons to advance his knowledge and abilities. Additionally, he organised a coding competition for high school students in the area, showcasing his organisation and leadership abilities.

I have no doubt that he has the necessary skills, drive, and passion to succeed in the rigorous Master's program in your institute. As his professor, I am confident that he will bring immense value to the program and make notable contribution to the field. I strongly recommend Parthiv Chakma for admission to the master's program without any reservation.

Yours sincerely,

Dr.D KARTHIKEYAN , Ph.D

Assistant professor,

Department of EEE,

SRM Institute of Science and Technology,

Kattankulathur-603203, Tamil Nadu,India
