Date: Mar. 30, 2022

To Whom It May Concern

It is great pleasure to write in support of Mr. Muhammad Ali Saleem, whom I know from the last four years as a student and he is applying to the Master program at your esteemed University. The courses he studied from me were Material Engineering, Refrigeration, Air Conditioning and Computational Fluid Dynamics. These courses have provided me with many opportunities to assess him academically. I was also a supervisor of his final year project (FYP) "3D printed mimicking robotic drilling arm".

Furthermore, he can actively engage in numerous challenging tasks concurrently without compromising the work quality. One of his matchless talents is the ability to grasp technically strenuous material on his own and come up with genuine and striking ideas.

He has discussed to me his dream of pursuing his goals and dream subjects in detail, and I believe that he has the required knowledge and skills to succeed in this course. I hope he will do well in this course and will adjust into the new environment.

In summary, he is clearly the best student I have met among the batch of his department. I am confident that Muhammad Ali Saleem will become a good Master's student. Hence, I hope he can start his new adventure in your university.

Dr. Tipu Sultan

Assistant Professor
School of Engineering
