LETTER OF RECOMMENDATION

I am pleased to recommend to you Mr. Muhammad Ali Saleem, I have been an integral part of his student life for about three years now. During this period, I have taught him Finite element analysis, Machine Design and Mechanics of Materials. This interaction, between us, has introduced me to some of his unique abilities and personality.

His strong desire to search deep, I believe, makes him what he is. This added to his passion for the subject gives him a unique edge over his peers and makes him an excellent student. His never-ending thirst for knowledge, I am sure, will make him successful when he takes up research at the master's level.

High grasping power and ability to reason logically seem to come naturally to him. His punctuality and meticulous nature, keep him well ahead of his peers he also maintains a very good rapport with his peers and is a team man. His ability to convince people has always impressed me. Good communication and Technical skills help him to be at the group discussion classes.

Mr. Ali Saleem is applying for MS admission at your prestigious Institute and I feel immense pleasure in recommending him for graduate studies of his interest at your institution. I believe that, if admitted, he will be an excellent addition to the prestigious institutions as well as the organization that he will choose for his professional career.

If you need further information, please do not hesitate to contact me.
