

## STATEMENT OF PURPOSE

I chose to apply to Fachhochschule des Mittelstands because of its excellent reputation for assisting international students like myself in preparing for higher education in Germany. I have heard great things about their outstanding programs and supportive environment. Also, living in Berlin will allow me to get ready for university while experiencing a diverse range of cultures. Berlin in particular being the capital of Germany, provides excellent, reasonably priced engineering and technology institution. FHM is one of the top research institution with good job prospects.

The university provides excellent education for international students, allowing them to successfully move into German higher education. I value the Academy's encouraging learning atmosphere and emphasis on using knowledge in real-world situations, as these fit in nicely with my academic and professional objectives.

I picked the T-course in Studienkolleg at Fachhochschule des Mittelstands because it is relevant to my engineering interests and professional ambitions. The program builds a strong foundation in mathematics, physics, and computer science by combining theoretical knowledge with practical abilities. FHM emphasis on practical applications and hands-on learning guarantees that I'll be ready for opportunities and challenges in the engineering sector. The supportive learning atmosphere and innovative research at the university make it the best collaboration.

During my time in school, I've had the opportunity to work on numerous fascinating projects that have advanced my path towards engineering. One project that sticks out is the creation of a simple robotics system, where I gained practical coding and problem-solving skills. Although I haven't had any official professional jobs yet, these experiences have fuelled my enthusiasm for engineering and piqued my interest in learning more about the area.

Initially, I began learning German as part of my degree, but it soon fascinated me. Beyond scholastic need, exploring the language and culture became a true fascination. It's like solving a captivating mystery, with each lesson revealing something new and interesting. Now, learning German isn't just a task, but a delightful journey of discovery. Having completed the B2 level, I'm excited to further explore its depths and expand my understanding of this fascinating language.

After my graduation, my goal is to work in an IT company. I'm drawn to the dynamic and innovative environment of the tech industry, where there's always something new to learn and exciting challenges to tackle. I see myself working with brilliant teams, advancing the development of cutting-edge software solutions, and having a real influence in the world of work. Whether it's in software development, cybersecurity, data analysis, or another area within IT, I'm excited to use my skills and passion to make significant progress in the field.
