VISION

To pioneer innovative solutions in technology that enhance user experiences and transform industries globally.

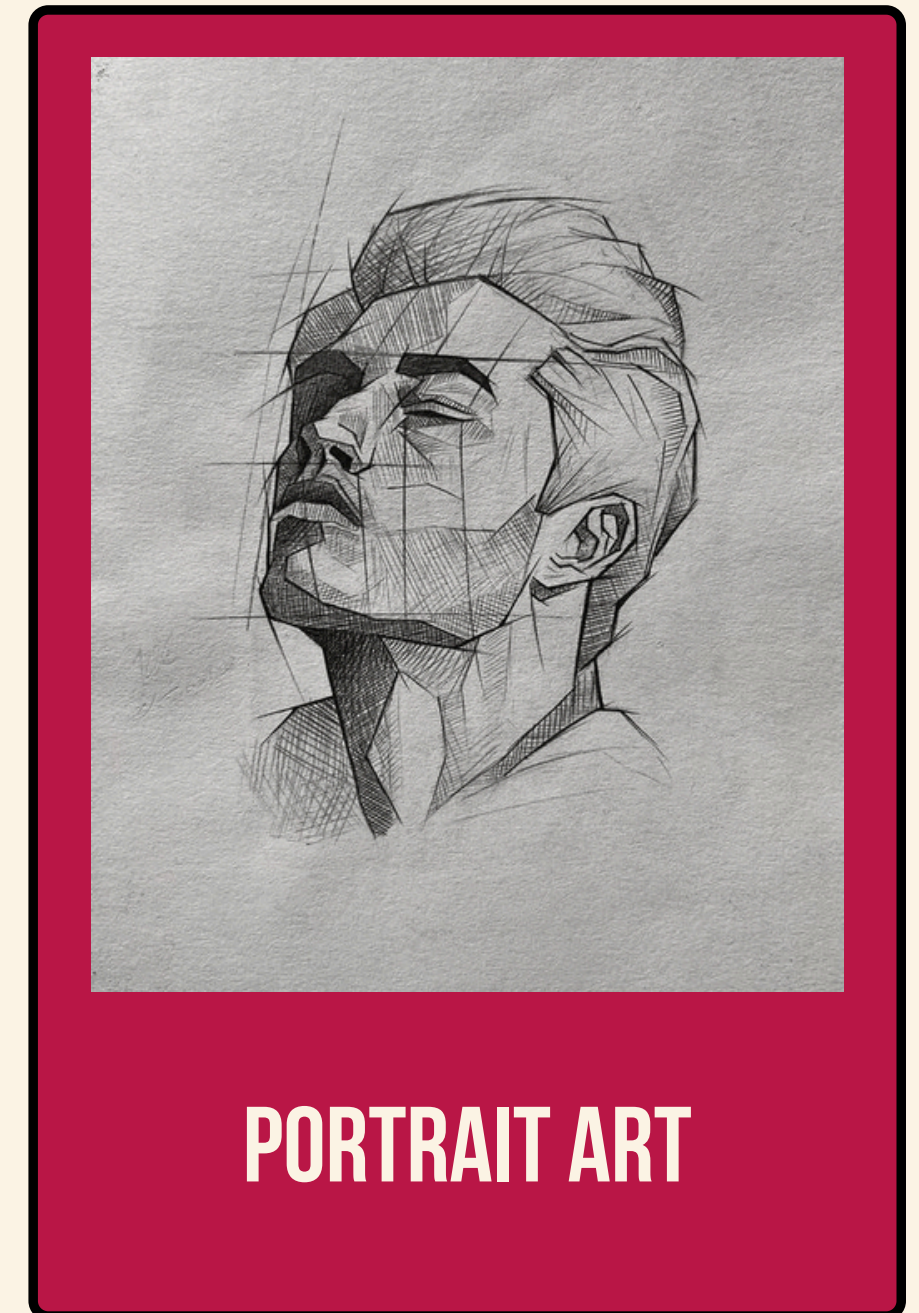

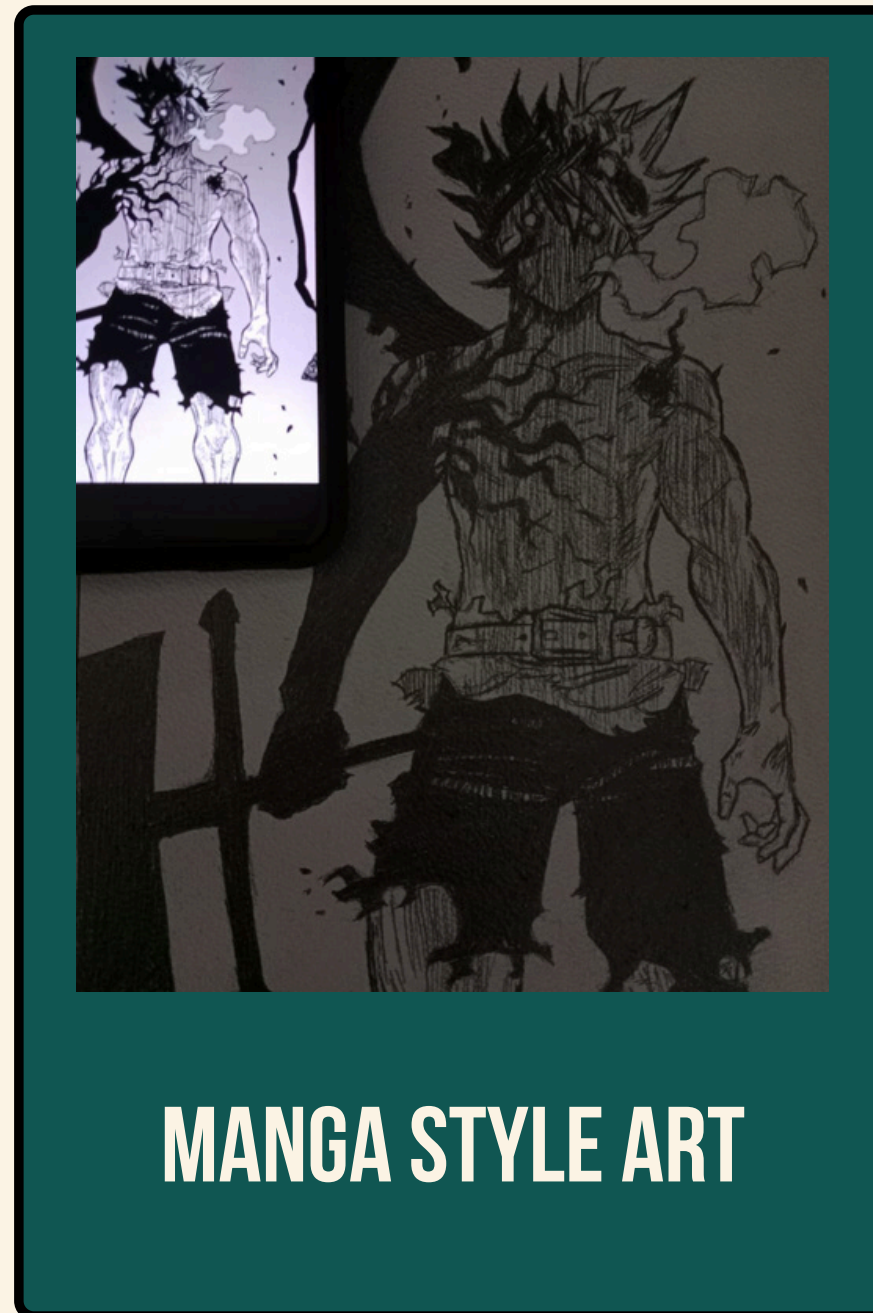

MISSION

My mission is to leverage expertise in computer science to develop cutting-edge software solutions in artificial intelligence and cybersecurity. I aim to deliver impactful solutions that streamline operations, improve efficiency, and foster technological advancement in society.

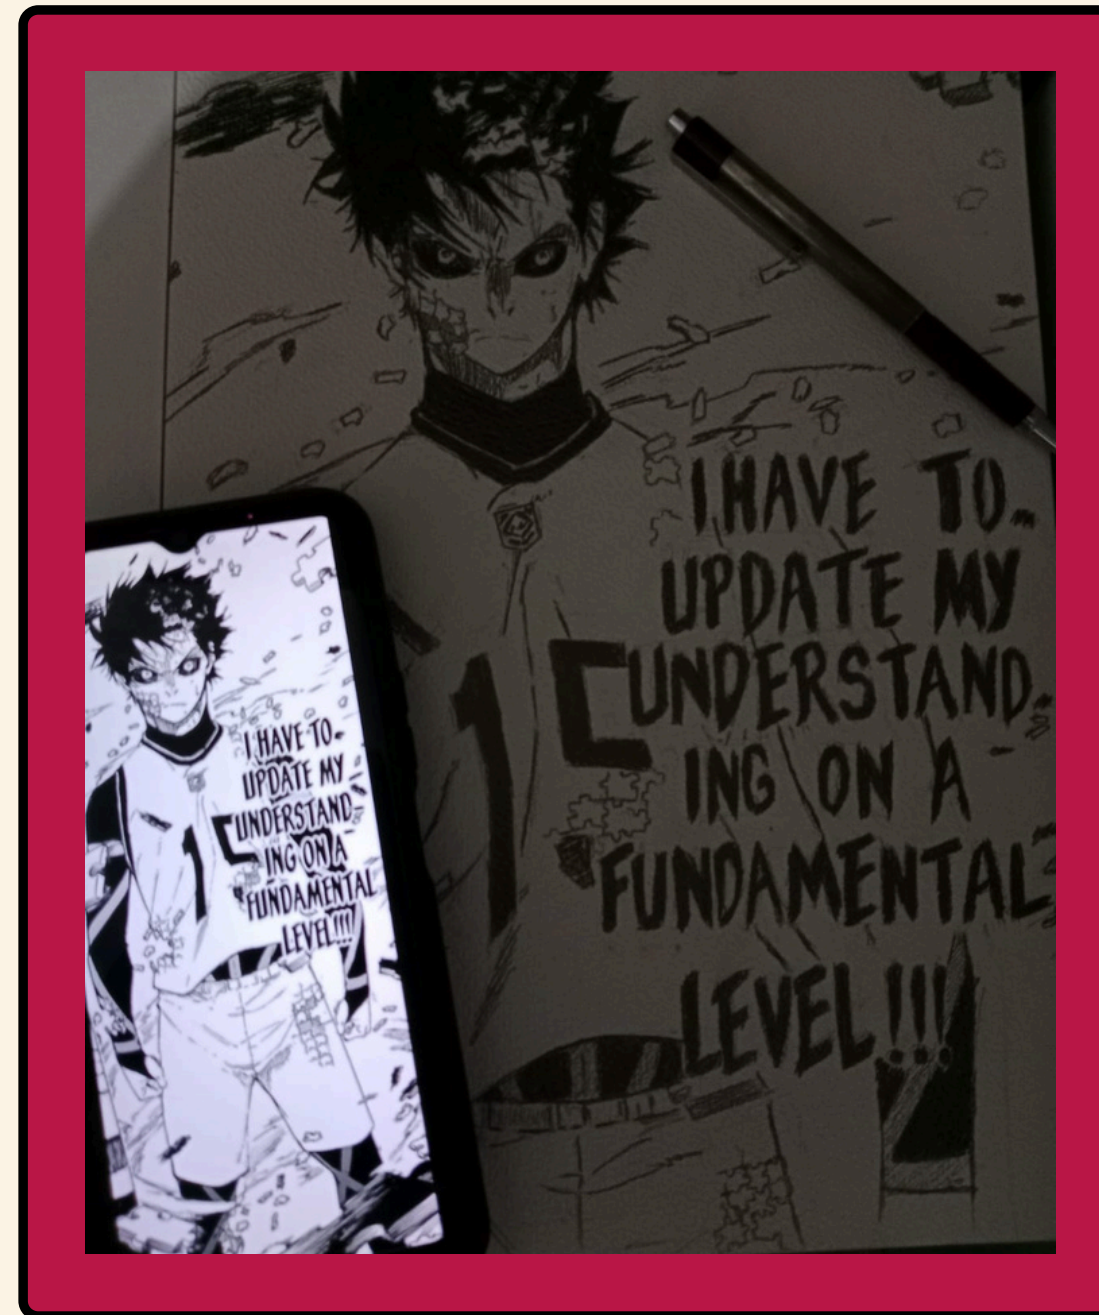

personal
SKILLS

I'm an artist specializing in manga-style art and portrait drawing. My work blends intricate manga aesthetics with emotive, realistic portraits, capturing both imagination and human expression with precision.

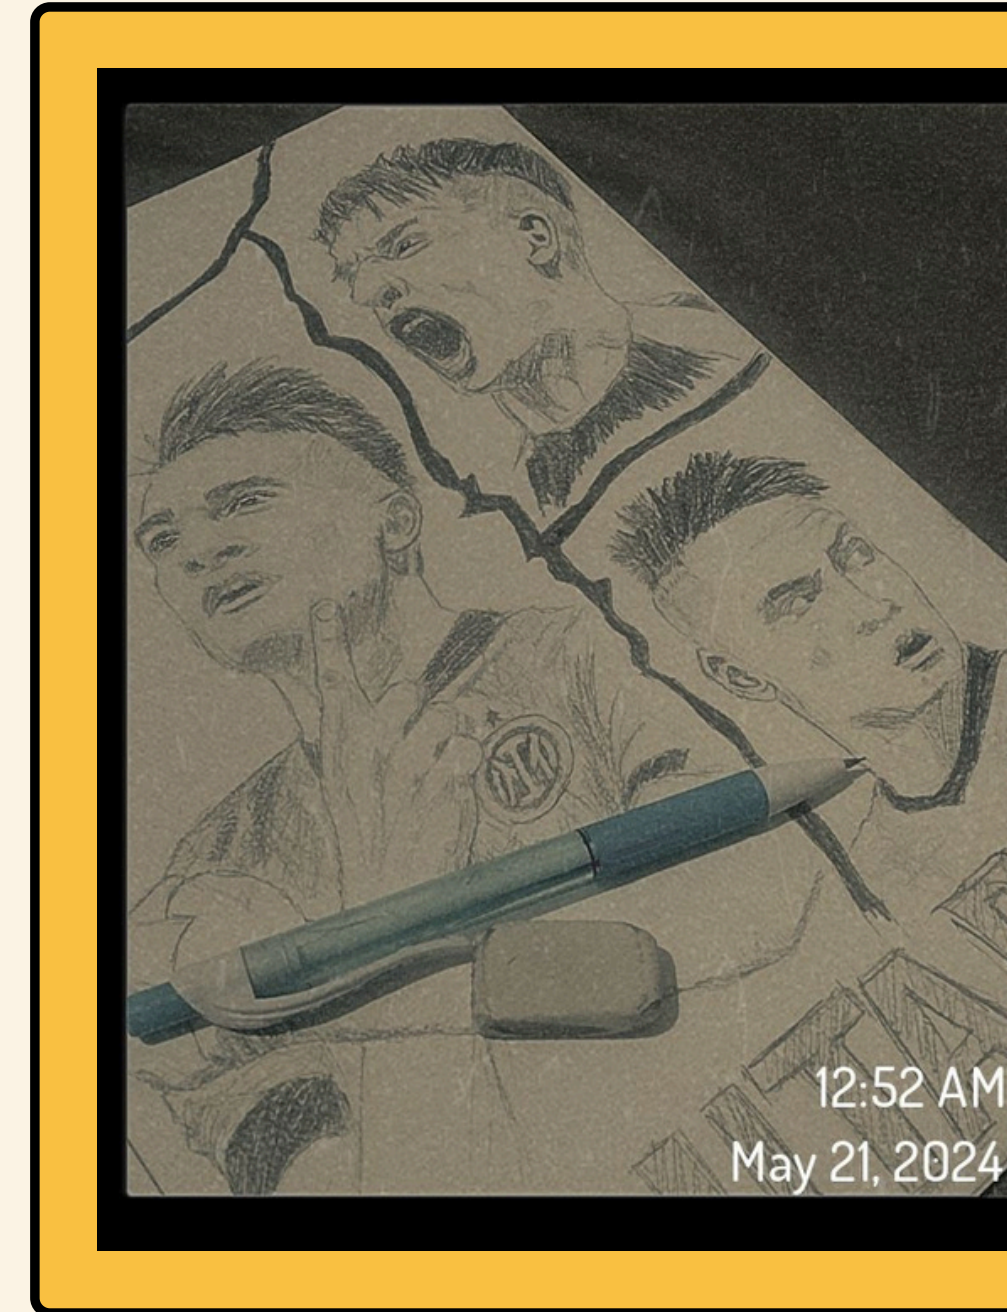

MANGA STYLE ART

Manga are comics or graphic novels originating from Japan. Most manga conform to a style developed in Japan in the late 19th century, and the form has a long history in earlier Japanese art. The term manga is used in Japan to refer to both comics and cartooning.

PORTRAIT ART

Portrait art refers to a visual representation of an individual or group, typically focusing on the face and capturing the subject's likeness, personality, and essence.
