PROJECTS

[22 Mar 2023 – 24 Mar 2023]

Granulometric and Sedimentological studies of beach sediments {From Azheekal Beach, Kollam}

The study was taken out in the pre-monsoon period of Kerala in the Azheekal coast by a group of five students assisted by an assistant professor. The grain size and mineralogy of the sediments were noted and the high weight percent of sediments were identified which led into the conclusion that the sedimentation from the Western Ghats are continuously occurring in that coastal stretch.

[20 Jan 2023 – 24 Jan 2023]

Geology Field

The field work was held in Tamil Nadu and Andhra Pradesh. It was a four day long field visit, where different places were visited and samples were collected alongside.
