

STATEMENT OF PURPOSE

Let me introduce myself as Gayathri M R, a dynamic professional looking forward to pursuing a promising career in the field of data science. I am from Kerala, a state in the southern part of the country India and I am a proud owner of an Indian passport No. Y1296666. I was passionate about the field of Ethical hacking and Data science and hence I decided to join for my Bachelors program in Cyber forensic at School Technology And Applied Science in Chuttippara Pathanamthitta after my schooling. I completed my graduation in Cyber forensic in the year 2024 with an aggregate of 66.6% marks. Currently, I am living with my family consisting of my father, mother, brother and grandmother.

Reasons for me to Choose DataScience Engineering program at University of Maribor, Slovenia

First of all, the reason why I chose this course is the potential of data in today's world and day by day technological innovations are making life easier. A career in data and computational science offers plenty of opportunities to work on interesting projects and solve challenging problems, I came to the conclusion that to go ahead with the master's in Data Science. This program will significantly improve my abilities and help me become a better professional. Another benefit I saw is that by engaging with people from many cultures, I will develop my ability to think in all directions.

Pursuing an M.S. in Data Science will provide me with a comprehensive understanding of statistical analysis, machine learning, big data technologies, data visualization, and more. With the growing reliance on data-driven decision-making in various industries, expertise in data science has become crucial. This program will enable me to become a valuable asset in the IT and business sectors. Additionally, I am passionate about technological advancements and eager to contribute to the innovative world of data science.

I found that there are numerous such opportunities in IT companies in India. I came to the conclusion that if I wanted to be successful in such a very competitive environment, I needed to improve my talents. I will not be able to achieve my great dream with a little upgrade or a straight forward certification. I therefore looked at courses that would greatly enhance my Post graduate profile. Riga Technical University in Slovenia is one of the best venues for me to shape my character and professional life, according to my online research. A reputable educational institution, Slovenia University Offers A Wide range of IT-related degrees. I am confident that choosing to enroll in this program was the finest choice I could have made for myself in terms of building a bright future and achieving my goal of being an Data science professional. The inclusion of courses and the primary modules taught as part of the program determine the success percentage of choosing advanced education.

Why not India and why Slovenia for pursuing my Masters Program?

When I made the decision to pursue higher education, I started researching the country in which I would need to enroll for the course. While many nations have opened their doors to students from all over the world, Slovenia is a developed nation that offers higher standards of health, education, and quality of life along with a diverse market economy. I Will be able to grasp variety in terms of language, culture, opinions, and experience thanks to the program, which will significantly impact how my personality and future job are shaped. I have every confidence that this theoretical and collaborative study method, which is more goal-oriented, will enable me to graduate with honor and confidently tackle my future profession. Slovenia is a secure country that has managed urbanize while preserving its real culture. This curriculum will allow me to explore several facets of this field because it is more practical focused than course number of other nations.

My Long term Personal and Professional Goals

My future plans and potential career paths are extremely clear tone after I complete the program. I want to continue my career in India after acquiring all the necessary professional experience. I intend to return to my home country and to manifest the things I learned so that I can be a part in the development of my country. As India has a growing demand for professionals in various industries, making it a promising place to apply my skills and knowledge. In addition, my international education and experience can be a valuable asset in the Indian job market.

After the program is over, I want to be there for my parents and provide them with emotional support. In the long run, my goal is to care for my parents as they age and .My large extended family and many other relatives all reside in India. I have a strong affinity for Indian culture, customs, and spirituality. The Indian context serves as the major canvas for all of my ambitions and aspirations for my profession. I firmly believe that the international education I've chosen should be put to use creating a peaceful life for myself in India.

The course I intend to take will be beneficial to me in the future. I am confident that you will take into account my application in order to let me pursue my academic goals and future aspirations.
