LETTER OF RECOMMENDATION

I take immense pleasure in recommending Mr. Reshvan Raj for admission into the master's program in your esteemed university. He was a student of this institution for the B.E- Aeronautical Engineering during the period of 2017-2022.

A responsible, organized, and focused student. He adapted very well to his project partners and rendered both projects successful. Based on my observations, I would say that he is a highly intelligent, sincere, and hardworking student with a tremendous drive to reach his goals. He is a keen observer and has the requisite aptitude to take up any difficult assignment in the field of study that he is passionate about. Always self-motivated and motivated the other members too during the hard times of the project, and his contribution to making the project successful was commendable.

Mr. Reshvan Raj belongs to the category of a graduate student who is always eager to learn new things and devise the knowledge gathered in an innovative way. Graduate studies provide a merge window to these aspects. On the other hand, postgraduate studies can help make him a full-filled professional engineer. Given a chance, he can turn out to be a real asset to society and people.

I have a strong opinion that he has the right aptitude to excel in postgraduate studies and hence strongly recommend him for admission to your university.

I wish him good luck and success in his future endeavors.

Regards

(Dr. V.T. GOPINATHAN)
