Letter of Recommendation

I extremely happy to recommend my student Vansh Jakhar was a bonafide student of 10+2 (Non-medical) of our school. I have known him well for the past of two of years as my student. He is a good student of high morals and ethical standards. Till date, I often have many opportunities to interact with him and we often discuss his future goals and paths.

He is an attentive student in the class and his communication and coordination skills are good. He can carry out practical work independently and also extended good cooperation in teamwork. He maintains good relation with his teacher and fellow students. I found him highly motivated and focused about his career goals. He is quick learner, hardworking and sincere student. He also took part in many quiz competitions and seminars held in school.

I feel that he will excel in research in his future goals, So, I strongly recommend him for admission with full financial aid.
