

## **STATEMENT OF PURPOSE**

My name is Jobsy Judit, I am 24 years old and currently residing in India, Kerala. I have completed my Bachelor's Degree in Commerce. I am interested in pursuing the Master of Logistics and Supply Chain Security offered by the Riga Technical University to learn from one of the best faculties in the Latvia and gain further academic progression and enhances my academic heights to the next level. I believe this accomplishment would provide me with the strength for all my future endeavors and career prospects in the Indian logistics sector.

I completed my 10th grade from state board at St. John's H.S.S KERALA with 77% in 2015. Then I proceeded to complete 12th standard in COMMERCE from Govt. Vocational Higher Secondary school, Pallarimangalam with an overall 75 % score in 2017. Later I completed B.com Finance and Taxation from Mahatma Ganthi University in the academic year 2017-2020. After that I joined for Chartered Accountancy course and completed articleship at CA Prasanna M & company in the year 2021-2024.

At the time of Articleship, I realized that there is a huge scope in Logistics in India. Hence, I decided to search for a suitable option that can fulfill my future endeavors. I have decided to pursue Masters in Logistics from a recognized international university. The scope of logistics is broad and encompasses various activities involved in the movement and management of goods, service, and information from the point of origin to the point of consumption. From a business family, I always had an interest in Business and it is evident that in every business there is a presence of logistics. Since Latvia is considered as the budget friendly country of the world for students to pursue quality education in a reasonable budget. Career development is only possible with knowledge, skill, and a better personal network. Since my career graph till now is a blend of studies and work experience in management level further development in my field is much more effective with international exposure. I believe that the Latvia will be the right place for me to start exploring.

Furthermore, the Latvia offers students the opportunity to attain an internationally recognized and respected academic qualification. It's a worthy place to study because of its high-quality education infrastructure, teaching methodology, rich heritage, and culture. The distinctive kind of education and learning style adopted by universities in the Latvia will make an individual innovative, creative and make them think freely.

It provides a chance to increase knowledge levels and improve skills in the subject area. Studying in the Latvia will help me to develop excellent language skills and improve upon the foundation that I already possess. Finally, when compared to many other countries like the US, Australia, UK, and Canada, the course fees of Universities in the Latvia seem to be affordable and fair. After researching through different countries, I was able to conclude that masters from the Latvia will be the best option for a successful future.

The Riga Technical University is one of the most popular universities among the students and working professionals in the Latvia. The campus facilities are too good and help students to build a great career in future. Out of shortlisted universities, choosing the right one was easy. I compared the course modules, fees, facilities, and much more. So it was an obvious choice for me to pick this university for my further study.

The master of Logistics at Riga Technical University is designed to develop an innovative and entrepreneurial leader by the time a student becomes graduate ready. It will help me to broaden my horizon and learn about a variety of approaches to business and leadership. Here I will be able to utilise the university's extensive industrial link for personal and professional growth with a comprehensive community. I am also attracted to features including start up evenings, enterprise program. I am also impressed by the fact that Riga Technical University offers award winning facilities including libraries, help desk and students lecture rooms as well as study areas . Overall an academic year with the prestigious Riga Technical University would be a life changing experience for me.

Upon successfully completing my masters program I wish to return to my country. Here I'd like to use my new found knowledge and skills to establish a business. In my believe, I have explained my reasons for choosing Latvia as my study destination and for selecting the course offered by Riga Technical University. I believe that I can join the course starting in September 2024. I also state that all the information provided in the document is true and correct to the best of my knowledge and belief.

Regards,

Jobsy Judit
