

STATEMENT OF PURPOSE

My name is Godwin Saji Abraham Parambu. I am a native of Kerala, India. I passed the AISSE exam, which is 10th grade, with 77% in 2021, and my higher secondary education examination with 80% from The Baker Vidyapeedh Senior Secondary School Kottayam in 2023, and now I am preparing to pursue a degree in bachelor of nursing. I want to be a nurse because I have always been passionate about helping others. Apart from that, my mother has been a nurse for more than 15 years, so her experience inspired me to pursue a career in nursing, where I can make a difference in people's lives every day."

I think it would be a great fit for my nursing program because, as my excellent academic background proves, I have the discipline needed to keep up with the program requirements and the ability to retain medical knowledge easily. During my school days, I somehow found an interest in science and tried to keep that for my future. Also, in practical terms, I always had a helping mind toward others, which is a great quality that was sought from my parents. I was very particular that I would prefer to do something related to the medical field than something else. At our school, I made use of the opportunities they provided to visit old age homes and also disabled people. I did a lot of research about this divine profession and concluded that a Bachelor of Nursing holds a broader and more productive role in society. In addition to that, I chose the science stream during my higher secondary education. Dealing with my grandparents' health issues has broadened my knowledge and ideas regarding many medical processes. My strong problem-solving skills, adaptability, and ability to remain calm under pressure make me well-suited for a nursing career, and I'm eager to use these strengths to improve patient care and outcomes.

In charting my academic journey towards nursing at LUHS my short-term goal is to acquire a comprehensive understanding of the latest advancements in healthcare, hone my clinical skills build a strong foundation in patient care, and also to emotionally connect with patients. LUHS stands out as the ideal institution to facilitate this growth. The renowned faculty and robust support systems at LUHS will undoubtedly play a pivotal role in shaping my journey toward becoming a skilled and compassionate healthcare professional.

Studying at such universities with splendid academic records will surely boost my skills, help me gain advanced knowledge, and help me become an expert in my specific field. With no doubt, my qualifications will be recognized worldwide. There are overlaps in the types of skills that students may develop through extracurricular activities and the skills that can help improve academic performance. In India, even in states with nursing colleges, the quality and capacity of training infrastructure may not be sufficient to meet the demand for nursing education.

I am drawn to pursuing my nursing education in Lithuania, particularly at the Lithuanian University of Health Science, captivated by its sterling reputation for nursing programs. The innovative curriculum, state-of-the-art facilities, and esteemed faculty members at LUHS promise a holistic learning experience that aligns seamlessly with my career aspirations. Choosing this esteemed institution not only ensures a world-class education but also opens doors to a diverse and enriching environment, fostering the growth and development of future healthcare leaders.

I am eager to contribute my passion for nursing to the esteemed community at LUHS and am confident that the skills and knowledge gained will propel me towards a successful and impact career in healthcare. To sum up, I am sincerely grateful for the opportunity to contribute to the vibrant academic community at LUHS. I am confident that my unique perspective and passion for nursing will not only enrich my academic journey but also positively impact the university's dynamic environment. Kindly consider my application, I am eager to embark on this experience Lithuanian University of Health Science.
