

INTRODUCTION:

Growing up, I've always had a hunger for success. I've always been intrigued by the financial sector, but what sealed my interest, was the need for a human touch to understand and work in the financial market. After all, Artificial Intelligence is a major blow towards knowledge-based jobs. I am excited to apply for the Bachelors program at IBS to develop my expertise and contribute to the field.

ACADEMIC BACKGROUND:

I completed my diploma from Our Own English High School Fujairah. My physics project on Variation in the Current Flow in a Circuit containing Light Dependant Resistor was highly appreciated by my teacher for its detail and accuracy. I have held several leadership roles including being a part of the student council and having been an active participant in the Debating Club.

MOTIVATION AND GOALS:

My passion for finance is driven by my hunger for success. In a world so volatile, the financial market is one of the few places where business almost always takes place. In all honesty, I've never wanted a simple desk job. I find it all too boring. I've always wanted a position that'll force me to think on my feet and come up with new challenges every day.

WHY THIS PROGRAM AND THIS UNIVERSITY:

I'm particularly impressed by the strong emphasis on finance and the university's facilities. The opportunity to learn from a well-renowned university is an excellent reason for my application. Coming from an Indian curriculum which emphasises theory, I hope the program's practical approach towards education will help bridge the gap between theory and practice.

CONCLUSION:

I am confident that the university's program will provide me with the advanced knowledge and practical skills necessary to achieve my goals. I am eager to contribute to and learn from your esteemed community. Thank you for considering my application.
