

STATEMENT OF PURPOSE

I am writing this statement of purpose to convey my fervent interest in pursuing a MSc in Construction Management. Mastering this discipline is pivotal for my triumph in the construction business. From our family business, founded by my grandfather, supplying construction materials to local contractors, my lifelong connection to construction began. Now, as we venture into real estate development, I'm driven to assume leadership. With commendable grades and a bachelor's degree in Civil Engineering, I've discerned that an MSc in Construction Management is my chosen path.

My bachelor's studies introduced me to various construction fundamentals, software, and tools, which further ignited my passion for creating spaces that transform functionality and embrace sustainability. Eager to delve deeper into methodologies that could enhance my innovations, I have decided to pursue a MSc in Construction Management at Kaunas University of Technology, a prominent public research university in Kaunas, Lithuania, stands as one of the largest technical institutions in the Baltic States. With a rich history dating back to 1922, KTU is renowned for its academic excellence, impactful research endeavors, and significant contributions to science and technology. KTU's modern campus in Lithuania's second-largest city offers state-of-the-art facilities for academic pursuits and research. Its global network provides diverse opportunities for international students and researchers. My knowledge, project involvement, and work experience make me a strong candidate for KTU's esteemed MSc Construction Management program.

After acing my twelfth grade, I pursued a BE in Civil Engineering at Prof. Ram Meghe Institute of Technology & Research. Subjects like Building Planning Design, Structural Analysis, and Computer-aided Design captured my interest. These essential topics in construction equipped me with foundational knowledge. During my bachelor's studies, I gained insights into Structural Analysis, Computer-Aided Design, and Steel Structures. These foundational subjects will undoubtedly facilitate the successful completion of my MSc in Construction Management coursework abroad.

As an Intern Assistant Site Engineer at RH Baig Construction, I meticulously documented daily events and managed orders. At M/s K.G.N Industrial Services, I monitored labor, supplies, and efficiently handled payroll. As a Supervisor at SB Construction, I oversaw project execution and honed my leadership skills.

Beyond gaining expertise and professional exposure, I prioritize a balanced life, recognizing our moral duties to the environment and others. I actively attend workshops and seminars, fostering communication, leadership, and teamwork skills. My innate calling drives me to innovate, design, and contribute to sustainable solutions globally. I'm eager to pursue an MSc in Construction Management. With boundless enthusiasm and a commitment to learning, I aim to master advanced technologies, bridging conceptual designs with tangible structures. Seeking an internship or entry-level role, I aspire to contribute to sustainable design and project management. My long-term vision includes leading a construction enterprise and fostering cross-cultural partnerships. Active participation in your esteemed university's program aligns with my career goals.

Additionally, I am applying for a Scholarship to alleviate the financial demands of higher education. This support would enable full dedication to my studies and access to pivotal academic resources and professional growth opportunities. It would also acknowledge my dedication and promise in Structural and Building Products Engineering. I am resolute in optimizing this chance to positively influence the university community.

Thank you.
