

Statement of Purpose

I'm Muhammed Jaseem Palli Kandi from the beautiful state of Kerala in southern India. My educational journey has been rewarding, filled with important milestones and experiences. In 2016, I finished my 10th grade studies at Sapphire Central School, laying a solid foundation for my academic pursuits. From there, I pursued higher secondary education, completing it in 2018. Motivated by my love for technology and a desire to enhance my skills, I pursued a one year Diploma in Mobile Service at Radix, Kerala. This program gave me practical knowledge and expertise in mobile technology, improving my skills in this fast paced field. I completed the program successfully in 2019. Wanting to explore language, literature, and human expression further, I decided to pursue a Bachelor of Arts degree in English Language and Literature. I attended the University of Calicut, where I dived into a world of literary classics and linguistic study. I graduated from the University of Calicut in 2023, with a deep understanding of the English language and its complexities. Throughout my time in university, I simultaneously held positions in different domains. From January to April 2022, I worked in Accounts & Warehouse Management at Didar Enterprises, Mangalore Port. Subsequently, starting from May 2023 up to the present, I've been serving as an Operation Executive at IAM School, located in Hilite Business Park. As I embark on a new academic journey, I am eager to expand my knowledge by pursuing a Bachelors in Economics and Management of public administration. I am excited about the opportunity to study at the prestigious Technical University of Kosice in Slovakia, known for its excellent academic offerings and international outlook. This next step in my education is not only a continuation of my studies but also a move towards achieving my goals of making a meaningful impact in the fields of economy, management, and public administration worldwide.

I decided to pursue a Bachelors in Economics and Management of public administration because of its broad significance and relevance in India. India's diverse economy and complicated governance systems create a special environment where effective management, strong economic policies, and efficient public administration play a vital role in promoting sustainable development. Recent economic reforms and initiatives like Make in India, Digital India, and Swachh Bharat Abhiyan demonstrate the need for skilled professionals who can handle the complexities of economic management and public administration to stimulate growth and enhance social welfare. I am very passionate about helping the country progress and I am excited about the opportunities in the economic and administrative fields in India. I want to use my skills and knowledge to contribute to society and make a positive difference in the development of the nation.

I chose to attend the Technical University of Kosice in Slovakia for several reasons. The university is highly respected and considered one of the top public institutions in Košice, which fits well with my academic goals. Ranked in the top 1001-1200 in the QS World University Rankings for 2024, the university has a long history of academic success and innovation. It provides a great setting for advanced learning and research. Moreover, the university is dedicated to offering quality education, has modern facilities, and a diverse student population, ensuring a rewarding academic journey. I am sure that by studying at Technical University of Kosice, I will have access to top notch resources and opportunities that will support me in reaching my academic and career aspirations.

I decided to pursue my higher education in Slovakia because of its impressive academic programs, lively culture, and convenient location in Europe. Slovakia has a long-standing reputation for outstanding education and cutting edge technology, with its universities consistently being ranked among the best in the area. The country's dedication to delivering top notch education in English, combined with reasonable tuition fees and living expenses, makes it a desirable option for students from around the world like me. Additionally, being situated in the heart of Europe, Slovakia presents exceptional possibilities for travel and cultural experiences. This will enable me to discover various landscapes, languages, and traditions. Choosing Slovakia as my study location fills me with anticipation, as I look forward to not only achieving my academic aspirations but also expanding my perspectives and indulging in a truly enriching cultural adventure.

After finishing my Bachelors in Economics and Management of public administration, I plan to go back to India with a wide range of skills and a global view. I want to use what I've learned in school to help improve the economic and administrative situation in my home country. I aim to participate in projects that support long term progress, improve government effectiveness, and encourage economic advancement. Whether in government, business, or social innovation, I am dedicated to using my skills to tackle important societal issues and generate positive change locally and globally. When I go back to India, I plan to have a significant influence on guiding its path towards prosperity and inclusive growth.

Warm Regards,

Muhammed Jaseem Palli Kandi
