

STATEMENT OF PURPOSE

(Bachelors in Informatics)

I am writing the statement of purpose to express my keen interest in pursuing bachelors in Informatics at Technical University of Koisce. My interest in computer started when I was introduced to Java in my high school. Over the years, I have developed a deep interest in computers along with information in robotics, thus I am applying for bachelors in Informatics.

I did my secondary education from The Oxford School and secured overall 75%. I have a good knowledge of physics, chemistry, maths along with information technology as I have studied this earlier in my school time.
