

Statement of Purpose

I, Divya, am writing this statement with utmost enthusiasm to express my sincere interest in pursuing a Bachelor of Science in Economics at Riga Technical University in Latvia. With a solid academic foundation and a passion for economics, I am eager to embark on this transformative journey that promises to shape my intellectual growth and career aspirations.

My journey into the realm of economics began during my high school years when I first encountered the subject. I was immediately captivated by its ability to explain complex socio-economic phenomena and provide insights into the workings of the world around us. As I delved deeper into the subject, I found myself drawn to its analytical rigor and practical applications. This passion for economics, coupled with my innate curiosity to understand economic principles, has been the driving force behind my academic pursuits.

Despite facing challenges, I have consistently strived for academic excellence. My academic record, with a score of 71% in 10th standard and 73% in 12th standard, reflects my dedication and commitment to learning. While my overall performance has been commendable, I recognize that my grades in economics (60%) may not be as high as desired. However, I believe that these grades do not define my potential or my passion for the subject. Instead, they serve as a testament to my resilience and determination to overcome obstacles and excel in my chosen field.

Riga Technical University's Bachelor of Science in Economics program stands out to me as the perfect platform to further my academic and professional goals. The university's reputation for academic excellence, coupled with its diverse and inclusive learning environment, makes it an ideal destination for aspiring economists like myself. I am particularly impressed by the comprehensive curriculum offered by the Economics department, which covers a wide range of topics including microeconomics, macroeconomics, econometrics, and economic policy analysis. I am confident that this rigorous academic program will provide me with the knowledge and skills necessary to thrive in the field of economics.

One of the Main reasons I am drawn to Riga Technical University is its location in Latvia, a country known for its rich cultural heritage and dynamic economy. Being situated in the heart of the Baltic region, Latvia serves as a bridge between Eastern and Western Europe, offering unique vantage point to study economic dynamics in a global context . Living and studying in a multicultural environment will not

only broaden my horizons but also enhance my cross-cultural communication skills, which are essential in today's globalized world.

In addition to academic pursuits, I am keen to engage in extracurricular activities and community service initiatives during my time at Riga Technical University. I believe that participation in such activities not only enriches the overall learning experience but also fosters personal growth and development. I am committed to making a positive contribution to the university community and to society at large.

In conclusion, I am genuinely excited about the prospect of pursuing my undergraduate studies in Economics at Riga Technical University. I am confident that my academic background, coupled with my passion for economics, make me a strong candidate for the program. I am eager to seize this opportunity to further my knowledge, expand my horizons, and ultimately, make a meaningful contribution to the field of economics. Thank you for considering my application.

Sincerely,

Divya
