## Letter of Recommendation

I am writing this reference letter in support of my student **Mr.Thota Naga Durga Bhavani Prasad**, who is desirous of seeking admission in your esteemed University. I have known him as an undergraduate student of Mechanical Engineering at **RK College of Engineering, Kethanakonda**.

He is capable of understanding and analyzing the critical aspect of subjects with great ease, which is rear trait that holds him in good stead in all his academic endeavors.

He has excellent knowledge and he uses it effectively in problem solving. His confidence, talent, maturity, interest and keeping abreast with the current development in his fields make him a promising research worker. He has given his utmost importance to quality, also executed several tasks with quality and perfection. One such project was "**Modeling and Static Model analysis of Shock Absorber by Using Different Materials**". His project is appreciated in vivid forms.

The number of seminars and symposiums displayed his ability of individual research. He undoubtedly possesses the ability to research and can get along harmoniously with faculty members and peers.

I strongly reiterate that with all his skills and assets, he deserves to be a part of your university. Hence I strongly recommend for his admission into **Masters Program** in your university with adequate financial assistance that shall go long way in consolidating his knowledge.

(Sri Rama Murthy Vuyyuru)
