

STATEMENT OF PURPOSE

My name is Akash kurian, and I'm an Indian citizen from Kerala. My family consists of four members. In terms of my academic history, I am presently pursuing a 12th grade major in the Bio-Maths stream. I passed my 10th grade with a 69% in 2021. Since childhood I was engaged in looking after my grandparents, seeing them happy with my help make me even happier. This interest leads me to aim to become a nurse. I believe nursing will educate me further and I see myself becoming a successful nursing professional in the future. Thus taking enough research, I decided to pursue Nursing BSc Honours at Ismu. I have applied to the course because I will learn the essential nursing skills needed to take effective care of patients in a live environment. It was during the childhood visit to the hospitals that have inspired me to become a nurse. I hope it will be fulfilled by studying this program. I am committed to work hard for the opportunities that could help me to achieve my goal. I find the course suitable that the clinical practical skills developed during the study will help me to equip with the critical thinking and decision making skills effective. I came to observe that the course is split equally between theory and practice. This finds appealed to me as it ensures to developed my skills through placements by enhancing critical and analytical approach to the care of patients. I will be taught by the dedicated academic staffs that teach the essential nursing skills needed to effectively care for patients in a live environment. The modules like - practice Learning Nursing, Developing Nursing Knowledge ,Developing Scientific Principles for Nursing, Consolidating Expansive Learning, etc are studied in the course.

I choose ismu because it has excellent facilities to cater to the needs

of a career aspirant. I will get real world career experience through this university. The university has projects and internships and learns from educators with world leading research and professional practices. Having an overall rating , the Ismu is recognized as the best University for higher education. It also has outstanding reputation where it is has best ranking among the world. The teaching approach is through innovative practice and research where I will learn what is important and helps to make an impact in the future. There are several academic assistance options available. Eliminating gender bias and promoting an inclusive culture. There is a specially categorized Student Welfare Advice which is dealing the financial, practical, and legal difficulties of students. Nursing program provided by Ismu often emphasize hands-on learning and practical learning facilities. The quality of education it provides in all academic fields is the main determining factor. Nursing courses in lithuanian University of Health Sciences provides the knowledge, values, skills you will need to pursue a career in a health care setting. In Ismu practical training is given significant priority which is also another factor behind choosing Ismu for my studies. This ensures to have a great deal of practical experience. This will enable me to adapt to working in any environment as I develop my inclusiveness and cultural sensitivity , I'm highly confident that securing this opportunity to study in lithuania would bring me rewarding opportunities and an experience that will benefit me in ways innumerable. These reasons have led me to choose the lithuania as my study destination.
