

STATEMENT OF PURPOSE

My name is Alwin Antony, and I am an Indian citizen from Kerala. I come from a family of five. I graduated with a major in Biology and Mathematics in the 12th grade.

Since my teenage years, I have always wanted to lead a healthy lifestyle. However, when I researched it, I found contradicting information on the internet. Therefore, I decided to learn from professionals rather than relying solely on research. This is why I chose physiotherapy as my career. I researched a variety of physiotherapy programs and finally came to the conclusion of pursuing a Bachelor's Degree in Physiotherapy at LSU. I believe this program will help me learn essential skills and provide patients with the most suitable care in a professional manner.

I find this course suitable as it emphasizes practical skills over theoretical knowledge. Additionally, I believe this course will help me in maintaining a healthy lifestyle. Moreover, it will teach me to adapt quickly to changes, as different patients have varying needs.

I aspire to become a physiotherapist and also plan to pursue further studies in physiotherapy or nutrition. Acquiring knowledge in nutrition will help me maintain a healthy lifestyle. This understanding will not only benefit me personally but also enhance my career, as a healthy lifestyle can prevent many diseases. With this expertise, I will be well-prepared to address both my own and my family's health needs.

I chose LSU because it offers excellent facilities customized to meet my needs. At LSU, I will have the opportunity to gain real-world experience and expert knowledge from experienced faculty members. Additionally, the university includes internships in its curriculum, which will further enhance my experience and have a significant impact on my resume.

LSU focuses on sports science, physical education, and other related areas. It provides modern facilities like laboratories, sports halls, gyms, and research centers, offering great opportunities for its students. The university also emphasizes practical experience and internships, which help students gain hands-on experience. Additionally, it organizes events, workshops, and other programs that facilitate better interaction with the community.

I am highly confident that securing this opportunity to study in Lithuania would bring me rewarding opportunities and an experience that will benefit me in my career. These are the reasons that have led me to choose Lithuania as my study destination.
