

Statement of purpose

My name is krishnendu Krishna. I have completed my senior secondary school education from JAWAHAR NAVODAYA VIDYALAYA under CBSE board. I have scored 91.2% in class XII th examination. I had pcb subjects in my post matric classes, which are physics, chemistry and biology. I have a great interest in biology which encouraged me to become the subject topper of biology by scoring 95%. I believe the knowledge I have acquired during these years in biology will help me to shine In the field of health care and medicine.

When I have done so much research about the courses that are linked to the health care and medicine, after matching those with my interests and passion I have come to a conclusion on choosing the course physiotherapy. I believe bachelors in physiotherapy will help me to acquire a vast knowledge in the particular field. As I'm very passionate about this field, it will make easier for me to learn and master this.

I have this strong interest for physiotherapy as it is not only focuses on a particular individual or society, but it also concentrates on the entire physical as well as mental health of the world. My biggest aim is to work under WHO that is world health organization. So, I have found that attaining a degree in physiotherapy is the best gate way to get into WHO. We all know about the hardships that we faced during the days of COVID 19. That is the time I came to know about this health organization which encouraged me to show someone interests towards it. I will be very happy and content if I ever get a chance to be a part of an organisation like that. I believe India needs more and more people to work on healthcare sector.

Being one of the best University with an attractive infrastructure, Lithuanian sports University grabs my attention. The new learning methods and teaching techniques are the main attracting features of this University. I believe Modern problems need modern solutions. The generation to which I belong, needs an advanced way of learning in order to survive in the well-advanced era. Attaining a degree is an easy task but from a well reputed one is a hard one. I hope if I get the opportunity to complete my bachelor's degree in physiotherapy from Lithuanian sports University, it will pave the way to achieve my goals.

Lithuanian is one of the countries which offers high quality education. The universities, faculties, students and their achievements are famous across the world. In my home country India, there are many universities which offer the course physiotherapy but being a sports University, Lithuanian sports University is the best choice that I can ever have because of the sports man spirits within me during the extra curricular activities. To achieve my goals, in order to get into WHO, I have to attain my degree from a reputed University as well as should get some exposure to develop myself.

Thanking you

Yours sincerely

Krishnendu.krishna
