

I was one of the student whose father always cared for him since he was young and always encourage him to become a doctor and this dream is growing with him . My father has nothing in this life except investing me , taking care of me , and I would like making him proud of me and see me the best . I'm qualified person that I'm mentally and physically willing to get into the great profession in medical since. Im sure that I will be one of the best Doctor in the world . I always try to be the best , I like that feeling and be something unique ,and I'm sure that I will be . Also ,I would like to help poor people and stand by their side as I know that feeling when you want to treat your family and you don't have that because of many reasons , one of the common reasons could be poverty , and I would like to help them without getting anything in return . In another hand , I enjoy in surgery I used to train in maxillofacial surgery with different Surgeon in different hospitals I saw many complicated cases after they got sever injury in their skulls and faces and some of cases spent over 7 hours during treatment so I loved this speciality .

Doctors taught me how can become and how is the to be a unique Doctor whether in working , dealing with patient , respect your self as a Dr, many ways that I learned and got through training , studying in addition I trained with multiple amazing maxillofacial and oral Surgeons and gots more experience than my age as I trained many times . Also ,from 3rd year in dental school I read many articles and text books and I know the anatomy of the skull very well based on my reading and the nerves and their branches and types of bones so I'm that person who's level of skills and knowledge above his level a lot .

I remember our Doctors in clinics they called by machine worker as I didn't stay without work at that time during training years . Also , in our city I became as a famous dentist during the internship , I have had posted that any person need help in treatment they need only to contact me , so many many people they visited me and I treated them and I got an amazing reputation and contacted me lots of people through my accounts whether in Instagram : Shaher_alsharari , Twitter: Shaher1532 or Tiktok : Shaher_alsharari . I'm strongly wish that to have an opportunity to join this program and as I mentioned it's my dream job all the time thinking about it after I finish the internship which is remaining only one month .
