

STATEMENT OF PURPOSE

“We all have dreams. But in order to make dreams come into reality, it takes an awful lot of determination, dedication, self-discipline, and effort.” –Jesse Owens.

I have always been fascinated by different people, cities, cultures and also the kind of infrastructure it inspires. In my childhood, I was amazed by the beautiful cityscape of Rajasthan. This state always had the eyes of many spectators from around the world. I belong to a humble family background; we migrated 1400 km approximately away from our hometown for bright prospects. I am glad to say that we have come a long way as a family; it is by product of our hard work, curiosity and positive approach.

Later on when I was deciding my career path, I came across some fields which my caught my attention, and among them I chose architecture. The field of architecture not only fascinated me but it has made me strive through challenging tasks. I saw how different people with different background pursued buildings and how both functional and humane environments were created. Hence when I pursued architecture as professional course I realized it was the best decision I have ever made.

In my Five years of Bachelor of Architecture curriculum, I got opportunity to learn many methods of presentation, from actual size scalable handmade building models, 2D presentations, MS Office components to 3D modelling.

I have worked on multiple projects during my Architectural studies; some of them are Beach Resort, Multi-Purpose Mall, landscape design in bungalow and Spiritual Centre, College of Architecture (Thesis project). All these projects were designed for locations all over India. Our study tour gave us the exposure and purpose required to understand material specification, construction style and MEP services involved in making a building a habitable. Architecture has definitely redirected my life's trajectory and gave me a new perspective towards learning.

Apart from studies, I have participated in extra -curricular activities as well, from being the Yellow House captain of my school to cultural head in college I have always been proactive in extracurricular activities. Like Tree plantation, sports competitions, workshops of communication, built tech and sustainability workshops to organizing free communal health events. I have also completed Diploma in Teacher Training (Preschool Level).

During my studies I have worked as an Intern with a reputed Architect for 6 months. To learn practical execution and legal documentation of Projects, Later, I have worked for 4 years in Pune and Mumbai City on variety of projects like Urban planning, Industrial, Hospital, Residential, Commercial Projects. I am currently designing Mall for display of finished products of Textile Park Factory owners and Factory units as per divergent client requirements. Apart from this I coordinate with Site Execution team for resolving on site complication. Team meeting with held and led with MD, Legal, Approval and Sales department of Company and planning of future Developments, to finally deliver product to be customer friendly in all aspects.

WHY HUNGARY FOR MASTER'S?

I have carefully chosen OBUDA University and Hungary for my master's, since it is a center of excellence and knowledge expertise, and the College, being a well-known, leading institution in the field. It is the rigorous academic structure with relevance to international context that attracts the worldwide students to Hungary. Moreover, the friendly and cozy atmosphere that Hungary provides, is an important element in this regard.

CONCLUSION

There is vast scope for professionally trained persons in Architecture field. After completing rigorous training from the College, I am certain that I will have good knowledge of Architectural management. I have some good business ideas nurtured in my thoughts for a longtime. I am sure that I can plan good methods to implement my business ideas, with the expertise I acquire from the University. Further, as a person completed master's course especially from OBUDA University, I will have more consideration in Construction and Architectural management resource field. I can assure that, my study at OBUDA University will be highly beneficial to myself.
