

1) Pursuing the course in supply chain management, motivates me because it is the core background for each and every industry, you can work as a supply chain manager for decades but you will be still learning new things every day. The main objective of supply chain management is profitability. It aims to maximise difference between what customers pay and how much it cost to produce and deliver the product. After having an experience of close to 2 years, I got to know how supply chain management is really important in every industry and after completing my bachelors in chemical engineering I was really excited to know how the industry works how do they make a huge profit after running such a big industry so after doing some research I knew that there is not only one person who handles the whole company there are lot of professional to handle the company. Where the supply chain professional is one of the backbone for the company so because of it I want to learn more and understand more about the supply chain management that is why I want to pursue this course. Even supply chain management has a good career opportunities which motivates me the most.

2) Like every other person, my dream is also to be a successful person in my life. My career goal is to have my own industry and a good profitable business and this program will really help me because this program will help me to know how the industry works. And knowing the backbone of each and every industry will help me to grow more.

3) Talking about the experience, I have an experience in chemical industry which also completely works on supply chain management, from finding the right Raw Material to get the best finalised product(output) not only this but also working with many professionals has also helped me a lot to know about how the industry really works and this experience might help me to cope up easily with my course.

Secondly, my final year project was making of fuel from waste plastic where I also learned how to make a useful product from completely a waste, from finding out the waste plastic till getting a fuel that can be used in industries this helps me to know how supply chain works everywhere. And because of having some good experience in industry as well as in project makes me a strong candidate for this program

4) The proudest achievement for me is I am an international esports player ranked 27 worldwide in 2019 in specifically the game PUBG where we cleared a lot of rounds and after that our team reached finals that was the happiest and proudest moment for me.

5) To contribute to the society as i am already a member of National Service Scheme that is NSS where we had a lot of camps to help peoples by donating blood by cleaning areas by spreading awareness about clean water and rainwater harvesting. So in a Future, I will continue to be in the same campaigns, even I can run some NGOs which will help the society such as by planting trees, by giving affordable education, donating food

6) As per me Unframed thinking, the word itself means to think beyond the frame means being an open minded having the freedom to think learning different things, exploring new fields being more creative, more innovative,that is what I think about the signature Unframed thinking

7) •Blogger Vlogger influencer  
•Entrepreneur

8) I am arranging my funds by taking a education loan

9) The responsibilities in Val organics Pvt Ltd I was an Trainee Production engineer, so I used to handle distillation columns, supervising and improve production throughout the plant or factory by supporting engineers team.

In Maha Agro Enterprises, I work as a Production engineer where, Not only used to handle distillation columns but also responsible for planning, designing and management of production process by using my engineering knowledge. Inshort my work was how the product will be manufactured or assembled on the production line, including design of packaging, ensuring the right quantity and quality and the speed of the production
