## LETTER OF RECOMMENDATION

**To whomsoever it may concern,**

It is with great pleasure that I write this recommendation letter for Mr. Ruthvik M P, to support his pursuit of a Master's program at your preeminent university. I got to meet him in my 'Basic Material Testing Laboratory' course during the 3<sup>rd</sup> semester of Engineering. He conveyed a great impression and demonstrated an immense interest in academics. I delivered classes in 'Surveying Practice-2' and 'Theory of Elasticity' to his batch in the fourth and sixth semesters, respectively.

Ruthvik is an outstanding individual with a strong character. Through the three years of knowing him, I have observed that he performs all the laboratory sessions with assurance and enjoys experimentation. Constant involvement in searching deeper into subjects and posing intelligent queries after each session are the hallmarks of his approach. In all the three subjects I taught him, he has excelled and secured optimum marks.

Apart from academic dedication, he has showcased organizational and competitive skills in areas of group activity, proving himself a collaborative leader on more than one occasion. He has always been receptive to new ideas and concepts and never hesitates to accept responsibility and carries out assigned tasks with great acumen.

In short, he is a person with all round facets of life and has huge potential to pursue higher studies.

I am confident that with his technical skills and persevering temperament, he will prove his mettle if admitted to your prestigious university. With his innate passion, creativity and positivity, he has the potential to become an asset to the class and to the university. I wish him every success in all future endeavours.
