LETTER OF RECOMMENDATION

Respected Admissions Committee,

I have known Chaithanya Laxminarayana during the seventh and eighth semester of his undergraduate program in Computer Science and engineering at Presidency University I knew him as his professor for Machine Learning and as the Guide for his final year project.

In my capacity as his professor, I have interacted with Chaithanya on an academic and personal level. His achievements in my classes were indicative of his caliber as a student. He was always up to date about the most current trends in Computer Science, even being caught up on global innovation in the field. His final year project showcased his grasp of the fundamentals in subjects like Artificial Intelligence, Statistics, and Image Processing. His fundamentals in Data structures and Algorithms, Python and C Programming are strong. He was very inquisitive and enthusiastically participated in classroom discussions too.

Additionally, for his project, he worked on Scale Invariant Feature Transform and Fuzzy C Means Algorithms. His ability to work together for the collective benefit of the team while ensuring that his task remains of the highest quality is Chaithanya's biggest strength and it has helped him excel academically. On the other hand, I believe that Chaithanya could improve his leadership skills as it is an inherent part of team responsibilities. By learning to delegate his tasks better, Chaithanya will be an even more effective leader and improve his managerial skills further.

We got to interact on several topics and research related discussions where he demonstrated his aspirations towards pursuing a career in development and I believe he possesses the potential to succeed in a stringent academic environment. Instead of being out rightly competitive and individualistic, Chaithanya would frequently engage the whole class and help them learn collectively I highly recommend his application to your esteemed university. I am confident that he will contribute significantly to the course through his academic expertise and collaborative learning style.

For any queries, clarifications, or additional information, please feel free to reach out to me.

Yours sincerely,

Dr Madhusudhan M.V.

Assistant Professor – Selection Grade,

School of Computer Science and Engineering,

Presidency University
