

➤ **STATEMENT OF PURPOSE**

I am **Muhammad Usman Ghani**, a resident of Pakistan City in Sialkot. I have completed Secondary high school on end of June 2023, and plan to carry out my higher studies in BSc Software Engineering from Germany, at the University of Europe for Applied Sciences. The education will give me a strong foundation to enhance my career growth.

➤ **How BSc in Software Engineering helps in achieving my career goal:**

- BSc in Software Engineering will equip me to facilitate theoretical and professional advancements in the domain of Software Engineering.
- On completion of this course, I will gain strong foundation knowledge in Software Engineering, creativity, problem solving, innovations, analytical thinking, and decision making, as well as develop the ability to handle and adjust to the upcoming changes in the field of Software Engineering.
- In fact, this course focuses on developing and improving skills that can be used in different jobs within the industrial sector.

➤ **Benefits of studying at University of Europe For Applied Sciences:**

- I chose the University of Europe For Applied Sciences because it is one among the reputed universities in the world.
- University of Europe for Applied Sciences is one of the most successful universities. Higher education with a strong history of successful placement services.
- It's an excellent place for international students, promoting skill enhancement and personal growth.

➤ **Program Learning lesson :**

- The Software Engineering program helps me understand the impact of software solutions within global, economic, environmental, societal, and ethical frameworks, with an emphasis on sustainability.
- Software engineers are responsible for designing new systems, solving complex problems, writing code, and working with a wide range of tools and technologies.
- This practical qualification will prepare me to graduate as a Software Engineer, ready for employment in various industries. Upon completion

of this course or program, I will acquire skills and knowledge in the latest software engineering practices and technologies.

➤ **My career expectations & opportunities after this course:**

- I am willing to contribute all my expertise that I will build during my studies, and I am confident of securing a position in a reputable company or government organization in the field of Software Engineering.
- I am certain that an education from the University of Europe for Applied Sciences will provide me with the right opportunity to achieve my academic and career goals in the world of technology.

➤ **The factors that led me to choose Germany for my higher studies:**

- The German education system is highly respected and recognized worldwide, particularly in the Pakistan.
- This status is one of the important factors influencing my decision to pursue a BSc degree in Software Engineering in Germany. The education offered here allows students to cultivate skills, knowledge, critical thinking, and practical application, all of which will benefit my future career and personal life.
- Therefore, I kindly request that you consider my application and grant me the opportunity to pursue my BSc degree at University of Europe for Applied Sciences.

Yours Sincerely,

Muhammad Usman Ghani.
