KAUNAS UNIVERSITY OF TECHNOLOGY
FACULTY OF MECHANICAL ENGINEERING AND DESIGN
DEPARTMENT OF MECHANICAL ENGINEERING

RECOMMENDATION LETTER FOR   21 August, 2024
Rahul Kumar

TO WHOM IT MAY CONCERN:

I am writing to offer my recommendation for Rahul Kumar's application to your esteemed master's program in Data Science or a related data analytical field. As his supervisor during his bachelor's thesis at Kaunas University of Technology, Lithuania, from January to June 2019, I had the pleasure of closely observing his academic and research abilities. Rahul completed his undergraduate studies in Mechanical Engineering study program from 2015 to 2019, during which he undertook a challenging thesis project focused on designing a car seat frame using finite element analysis "Design And Analysis of Car Seat Frame From Carbon Fiber Composite". Despite his background in Mechanical Engineering, Rahul demonstrated exceptional skills in mathematical modelling and data management.

Rahul's strong analytical skills, combined with his practical experience and dedication to research, make him a good candidate for Master studies.

I believe that Rahul Kumar's will be a valuable asset to your institution, and I recommend him for admission to master studies in the field Data Science.

Please feel free to contact me if you require any further information.

Sincerely,
Prof. Dr. Paulius Griškevičius
