

**1.** Rennes School of Business is renowned for its high-quality education and innovative approach. Learning from experienced faculty and industry experts is invaluable to me. The program's focus on current supply chain trends, including logistics optimization, data analytics, and sustainability, aligns with my career goals. I appreciate the international perspective, which is vital for understanding diverse markets. The emphasis on hands-on learning through case studies and internships will prepare me for real-world challenges. Networking with peers, alumni, and industry leaders is also a key motivation for my career growth. Rennes' focus on innovation and technology in supply chain management excites me, as I want to explore how emerging technologies can transform the field. Overall, I believe studying at Rennes will foster my personal and professional development, enhancing my critical thinking and leadership skills.

**2.** My career goals revolve around becoming a supply chain manager with a focus on sustainability and innovation. I aim to lead projects that enhance operational efficiency while minimizing environmental impact.

The curriculum focuses on logistics optimization and data analytics, equipping me with essential skills for modern supply chain challenges. Hands-on learning through internships and case studies will provide real-world experience, while exposure to international practices will deepen my understanding of diverse markets. Networking with industry professionals and peers will also expand my connections and career opportunities.

**3.** I have experience in the chemical industry, where I worked on supply chain management from sourcing raw materials to producing final products. Collaborating with industry professionals has deepened my understanding of how the sector operates, which will help me succeed in my studies. Additionally, my final year project involved converting waste plastic into fuel, giving me practical insights into the supply chain process. This project reinforced my knowledge of transforming waste into valuable products, showcasing the versatility of supply chain principles. Lastly, I'm proud to have been ranked 27th worldwide as an international esports' player in PUBG in 2019. Reaching the finals with my team was a significant achievement for me. This experience reflects my determination and ability to perform under pressure, qualities that will serve me well in this program.

**4.** My proudest achievement is being an international esports player, where I ranked 27th worldwide in PUBG in 2019. After navigating numerous intense rounds, my team and I reached the finals, which was an exhilarating and deeply fulfilling experience. This accomplishment not only reflects my dedication and skill but also highlights the joy of teamwork and competition at the highest level. It stands as a testament to my commitment and passion for excellence in every endeavour I pursue.

**5.** To make a meaningful impact on society, I am proud to be a member of the National Service Scheme (NSS). Through this initiative, I've participated in various camps focused on donating blood, cleaning communities, and raising awareness about clean water and rainwater harvesting. Looking ahead, I am committed to continuing these efforts and envision running my own NGOs that champion causes such as tree planting, providing affordable education, and donating food. I believe that by empowering communities and fostering sustainable practices, we can create a brighter, healthier future for all. My passion for service drives me to be an active participant in shaping positive change in society.

**6.** To me, "Unframed Thinking" embodies the essence of breaking free from conventional boundaries. It's about embracing an open-minded approach that encourages exploration and creativity. This mindset allows us to venture into new fields, learn diverse perspectives, and cultivate innovative ideas. Unframed Thinking inspires us to challenge the status quo and envision possibilities beyond the ordinary, empowering us to transform our thoughts into groundbreaking solutions. It's a signature philosophy that celebrates the freedom to think differently and creatively.

**8.**I am securing my funds through an education loan.

**9.** At Val Organics Pvt. Ltd, I served as a Trainee Production Engineer, where I had the opportunity to manage distillation columns while collaborating with a team of engineers to enhance production efficiency across the plant. Currently, at Maha Agro Enterprises, I work as a Production Engineer, where my role has expanded significantly. I not only oversee distillation processes but also take charge of planning, designing, and managing the entire production workflow. My engineering expertise guides me in determining how products are manufactured and assembled on the production line, from packaging design to ensuring optimal quantity, quality, and production speed. Each day, I strive to transform concepts into reality, optimizing processes for better outcomes.
