LETTER OF RECOMMENDATION

I, Mr. S.N. Mishra, Head of the Department of Cell and Molecular Biology at Maharani Kalyani College, Darbhanga, Bihar, take extreme pleasure in writing this Letter of Recommendation for **Ajay Kumar Das**, a brilliant Undergraduate student of **Zoology** at our university. I have had the pleasure of teaching Ajay for 3 years as part of her course at the college, during which I have known him to be a highly motivated and sincere student.

Ajay can be easily described as an all-rounder - academically and personally. A top scorer every year, he goes the extra mile to help their fellow students learn and achieve their academic goals, which speaks a lot about his altruistic personality. This particularly came to my notice in the First Year of the UG course when I saw Ajay devoting her time and efforts after college hours to help a fellow student who was particularly weak in one of the semester subjects.

Seeing his keen interest in helping others, I recommended his name to the university for the tutoring council, which comprises hard-working and brilliant students who are asked to share their knowledge and learning with their peers in an attempt to grow and excel together. Ajay also showed a keen interest in extracurricular activities, mainly in research work. During her course tenure, she has regularly participated in several research activities at the university and inter-college levels. he has always displayed exemplary performance in each of them.

Ajay also displays some remarkable traits in his persona - leadership, teamwork, creativity, and adaptability to any person or situation. Furthermore, Ajay is extremely agreeable and conscientious. I would only be delighted to recommend her for the next step of career growth she wishes to pursue - an MSc in IT For Business Data Analytic at your esteemed university

I have no doubts in affirming that Ajay would continue to exhibit the same values and skills during his Master's, which she brought to the table during his Bachelor's at our university. I wish him all the best in all his endeavors with the hope and confidence that she will be a valuable asset to every institution and organization that she becomes a part of in the future.

Yours truly,

Mr. S.N Mishra

M.sc (Ph.D)

Associate Professor

Cell & Molecular Biology, Aquatic Toxicology, Histochemistry
