SCIENCE AND SCIENTIFIC STUDIES

- | | | |
|---|------------------------------|-------|
| 1 | Introduction to Science | 5-25 |
| 2 | Ethics in Science | 26-34 |
| 3 | Methods and Tools in Science | 35-47 |

BIOSTATISTICS

- | | | |
|----|---|---------|
| ✓1 | Introduction | 48-52 |
| ✓2 | Data Handling | 53-67 |
| ✓3 | Diagrammatic and Graphic Representation of Data | 68-92 |
| 4 | Statistical Treatment of Data | 93-117 |
| 5 | Interpretation of Data | 118-139 |

MICROTECHNIQUE

- | | |
|----------------------|---------|
| Tools and Techniques | 140-198 |
|----------------------|---------|

BIOPHYSICS

- | | |
|-------------------------|---------|
| ✓Biophysical Techniques | 199-236 |
|-------------------------|---------|

APPENDICES

- | | |
|--------------------------|---------|
| i) Syllabus | 237-238 |
| ii) Model question paper | 239-240 |

Chapter

ENVIRONMENTAL STUDIES

1	Introduction	5-12
2	Natural resources	13-65
3	Écosystem	66-75
4	Trophic organization □ Food-chain Food-web □ Growth pyramids	76-89
5	Ecological energetics	90-95
6	Biogeochemical cycles	96-103
7	Ecological succession of plants	104-119
8	Plant adaptations	120-143
9	Major ecosystems of the biosphere	144-187
10	Biodiversity and conservation	188-235
11	Global initiatives in biodiversity conservation	236-244
12	Environmental pollution and <u>management</u>	245-284
13	Environmental legislation in India	285-295
14	Global environmental problems	296-314
15	Disaster management	315-326

Primary
secondary

Solid
waste
management

Acid rain
G.W, Green
house effect

Ozone layer
depletion

PHYTOGEOGRAPHY

1	Introduction	327-330
2	Distribution of plant species	331-340
3	Continental drift hypothesis	341-346
4	Vegetation types of India	347-350
5	Phytogeographical regions of India	351-356
	i) Syllabus	357-359
	ii) University model question paper	359-360

CONTENTS

Chapter

Page No.

BRYOLOGY

- | | | |
|---|---|-------|
| 1 | Bryophyta | 5-53 |
| | General characters. Classification. Evolution. Riccia. Marchantia. Anthoceros. Funaria. | |
| 2 | Evolution of sporophyte and gametophyte in Bryophyta | 54-62 |
| 3 | Ecological and economic importance of Bryophytes | 63-69 |

PTERIDOLOGY

- | | | |
|---|---|--------|
| 1 | Pteridophyta | 70-158 |
| | Salient features. Classification. Evolution. Psilotum. Selaginella. Pteris. Marsilea. Affinities. Heterospory and seed habit. Apospory and apogamy. Parthenogenesis. Stellar evolution. Economic importance. Indian pteridologists. | |

GYMNOSPERMS

- | | | |
|---|---|---------|
| 1 | Gymnosperms | 159-237 |
| | General characters. Classification. Cycas. Pinus. Gnetum. Affinities. Evolutionary trends. Economic importance. | |

PALAEOBOTANY

- | | | |
|---|---|---------|
| 1 | Geological time scale | 238-241 |
| 2 | Fossils and study of fossils | 242-248 |
| 3 | Fossil Pteridophytes and Gymnosperms | 249-260 |
| | Rhynia. Lepidodendron. Lepidocarpon. Calamites. Lyginopteris. Williamsonia. | |
| | i) Syllabus | 261-262 |
| | ii) University model question paper | 263-264 |

CELL BIOLOGY

1. Introduction	5-11
2. Plant cell wall	12-23
3. Plasma membrane	24-28
4. Endoplasmic reticulum	29-32
5. Ribosomes	33-40
6. Mitochondria	41-48
7. Plastids	49-59
8. Lysosomes	60-65
9. Golgi bodies	66-69
10. Microbodies	70-75
11. Plant vacuole	76-77
12. Interphase nucleus	78-84
13. Chromosomes	85-104
14. Chromosomal changes	105-123
15. Cell Reproduction	124-143

CLASSICAL GENETICS

1. Introduction	144-151
2. Mendel and Mendelism	152-169
3. Modified Mendelian ratios	170-184
4. Multiple allelism	185-195
5. Quantitative inheritance	196-203

PLANT PHYSIOLOGY

1	Water relations of plants	5-39
2	Transpiration	40-56
3	Mineral nutrition in plants	57-78
4	Photosynthesis	79-135
5	Translocation of photoassimilates	136-142
6	Respiration	143-188
7	Nitrogen metabolism in plants	189-207
8	Plant growth and development	208-225
9	Photoperiodism and vernalization	226-234
10	Bud dormancy, seed dormancy, seed germination	235-244
11	Plant movements	245-256
12	Stress physiology	257-268

BIOCHEMISTRY

1	Biomolecules	269-288
2	Carbohydrates	289-313
3	Proteins and amino acids (exam day mrrng)	314-348
4	Lipids	349-376
5	Enzymes	377-408
6	Secondary plant products	409-419

Appendix

i)	Syllabus	420-422
ii)	University model question paper	423-424

Contents

Chapter	Page No.
1 ✓ Introduction	5-15
2 ✓ Plant tissue culture	16-25
3 ✓ Sterilization (aseptic) techniques (Culture pendings)	26-31
4 ✓ Procedure or protocol of plant tissue culture	32-71
5 ✓ Recombinant DNA technology	72-112
6 ✓ Gene transfer techniques	113-125
7 ✓ Methods in biotechnology	126-152
8 Applications of biotechnology	153-172
9 ✓ Biosafety and ethical issues	173-178
10 ✓ Microbial and industrial biotechnology	179-193
11 Nanobiotechnology	194-233
Appendix	
i) Syllabus	234-237
ii) University model question paper	238-239

CONTENTS

Chapter

Page No.

MOLECULAR BIOLOGY

1 ✓	Introduction	5-6
2 ✓	The genetic material	7-14
3 ✓	Nucleic acids	15-51
4 ✓	Replication of DNA (2)	52-71
5 ✓	The concept of gene	72-88
6	Gene action or gene expression (6)	89-133
7 ✓	Regulation of gene expression (4)	134-150

GENERAL INFORMATICS

1 ✓	Overview of information technology (3)	151-185
2 ✗	Knowledge skills for higher education (5)	186-205
3 ✓	Social informatics (7)	206-234

BIOINFORMATICS

1 ✓	Introduction to bioinformatics	235-247
2 ✓	Biological databases (1)	248-270
3 ✓	Sequence analysis and alignment	271-281
4 ✓	Bioinformation in relation to biomolecular structure	282-291
	i) Syllabus	292-294
	ii) University model question paper	295-296

CONTENTS

Chapter

Page No.

HORTICULTURE

1	Introduction	5-12
2	Soil	13-33
3	Manures and fertilizers	34-55
4	Pots and potting	56-65
5	Irrigation	66-72
6	Garden tools and implements	73-81
7	Propagation of horticultural plants	82-112
8	Garden and gardening - (Flower arrangement + Bonsai)	113-152

PLANT BREEDING

1	Plant breeding techniques and methods	153-157
2	Plant introduction	158-164
3	Selection	165-170
4	Hybridization	171-186
5	Heterosis and plant breeding	187-192
6	Mutation Breeding	193-196
7	Polyploidy Breeding	197-199
8	Breeding of some selected crops	200-214

RESEARCH METHODOLOGY

1	Research and research methodology	215-236
2	Data handling	237-300
	i) Syllabus	301-302
	ii) University model question paper	303-304

CONTENTS

Chapter

Page No.

✓ ANGIOSPERM MORPHOLOGY

✓ 1	Morphology of flowering plants	5-37
✓ 2	Inflorescence	38-48
③	Flower	49-73
✓ 4	Fruits and seeds	74-90

✓ SYSTEMATIC BOTANY

1	Introduction	91-100
✓ 2	Systems of classification	101-120
✓ 3	Modern trends in Taxonomy	121-131
✓ 4	Plant nomenclature	132-141
✓ 5	Herbaria and Botanical gardens	142-153
6	Study of Angiosperm families	154-258

✓ ECONOMIC BOTANY

1	Common economically important plants	259-287
---	--------------------------------------	---------

✓ ETHNOBOTANY

1	Introduction	288-292
2	Common plants used by tribals	293-304

✓ PHARMACOGNOSY

1	Introduction	305-306
2	Herbal drugs	307-316

ANGIOSPERM ANATOMY

1	Introduction	5-6
2	Plant cell wall	7-21
3	Non-living inclusions of plant cell	22-34
4	Plant tissues	35-70
5	Tissue systems	71-81
6	Primary structure of stem, root and leaf	82-114
7	Normal secondary growth	115-137
8	Vascular cambium	138-143
9	Anomalous secondary growth	144-152

REPRODUCTIVE BOTANY

1	Microsporogenesis	153-164
2	Megasporogenesis	165-179
3	Pollination and fertilization	180-204
4	Endosperm development	205-208
5	Embryo development	209-220

PALYNOLOGY

1	Introduction	221-222
2	Pollen morphology	223-238

APPENDIX

i)	Syllabus (Calicut and Kerala Universities)	239-243
ii)	University model question papers (Theory and Practical)	244-248
