

Faculty of Pharmaceutical Sciences

LETTER OF RECOMMENDATION

To whom it may concern,

I am pleased to write this letter and offer my recommendation of Sukrutha.M for your master's program. I have been working with the PES College of Pharmacy for the past 15 years.

I can confidently say that Sukrutha is one of the best students that I have taught, and I am confident that she will make significant contributions to the health sector in the future. I taught her the subject Pharmaceutics in the 4th semester. She has consistently demonstrated a deep understanding of pharmaceutics, pharmacology, pharmaceutical chemistry, pharmacognosy, pharmaceutical analysis, clinical pharmacy, pharmacovigilance, and regulatory affairs, coupled with a strong commitment to clinical excellence.

Sukrutha's academic performance in our rigorous program has been outstanding. Her keen analytical skills and dedication were particularly evident in her project and industrial training. In addition to her academic prowess, she has shown an exemplary level of initiative and leadership. She played a pivotal role in participating in events and workshops, showcasing not just organizational skills but also an ability to work effectively in a team.

She possesses a robust skill set encompassing drug formulation, pharmacological understanding, laboratory techniques, patient counseling, regulatory compliance, and pharmaceutical management. She has volunteered at Omashram Trust Oldage Care Service, where she demonstrated patience and care in assisting patients with their medication management, earning high praise from both the staff and patients.

Sukrutha possesses the intellectual rigour, practical skills, and ethical grounding that I believe will make her an asset to your program. Her passion for advancing in pharma-related studies is palpable, and I am confident she will bring the same level of dedication and excellence to your master's program.

I am confident that Sukrutha will exceed your expectations and contribute significantly to the university's community.

Thank you for considering this application.

Warm Regards,

14/5/2024
Dr. Satish C S
Professor, HOD,
Department of Pharmaceutics,
EC Campus, Bengaluru-560100
