

# STATEMENT OF PURPOSE

## Introduction

I, Honeyndrajith T.R, would like to express my sincere gratitude to you for my application review. I was born on March 14, 2006, and I live in the Thrissur district of Kerala. I hold a valid Indian Passport with the number Y3732033. My family consists of 6 members: my father, mother, young sister and grandparents. My father is a government employee and my mother is a homemaker .

I have decided to pursue my higher studies in Austria to develop a bright future . I'm excited to apply to Johannes Kepler University (JKU) Linz in the artificial intelligence bachelor's program. I recently finished my +2 in science, and I can't wait to continue pursuing my interests in data and technology. Because of my educational background and my strong interest in artificial intelligence, I am certain that JKU Linz is the best place for me to advance and achieve my objectives in this field.

## ACADEMIC CREDENTIALS

I completed my secondary education in Carmel HSS Chalakudy in 2022 with 100%. After my secondary education I was enrolled for my higher secondary education in UHSSMambra, India which I completed in the year 2024 with 93.58%. I did my higher secondary education in bio maths (physics, chemistry, maths, biology, English). In this era I gained knowledge about artificial intelligence and it's important also my favourite subject was maths and maths is like a back bone in this field.

## BRAINSTORMING FOR FUTURE

I became fascinated with artificial intelligence because of my interest in physics and mathematics during my high school years. I found it interesting how intelligent systems can be constructed using data, logic, and algorithms. Whether it be via automation, machine learning, or natural language processing, I am especially interested in how artificial intelligence may transform industries and change society. To get into these topics and add to this quickly developing subject excites me.

An undergraduate course in artificial intelligence provides a strong foundation for the future employment and studies. I had done research about the courses and places, and finally decided to pursue my studies in JKU, Austria. After a lot of research, I decided to pursue a bachelors degree in artificial intelligence from Johannes kepler university linz, Austria

## REASONS TO PURSUE UNDERGRADUATE IN ARTIFICIAL INTELLIGENCE

I'm pursuing a UG degree in Artificial Intelligence because I'm excited about how it can change the world. AI is used in many fields, and I want to be part of that innovation. It offers great career opportunities, and I believe I can help solve real problems and improve the needs of world through AI. I found it fascinating how intelligent systems can be constructed using data, logic, and algorithms. ,I am especially interested in how artificial intelligence may transform industries and disrupt society. To go deeper into these topics and add to this quickly developing subject excites me

### Why Johannes Kepler University?

Johannes Kepler University appeals to me due to its cutting-edge teaching methods and stellar reputation in AI research and its high ranking in the world. It is one of the best universities in the world and will be the number one university in future . The university is the perfect location for me to get both academic knowledge and real-world experience because of its emphasis on interdisciplinary learning and its facilities. Getting to know academics and students who are as passionate about AI as I am and who can guide my ideas into relevant research and practical applications excites me in particular.

### Why Austria?

Austria is famous in its high quality education and life .It has rich culture and remains top in the happiness index . GDP of Austria is notable and citizens live there a happy life. Student life of Austria is amazing and can have a good future. Universities often promote cultural exchange with numerous events and activities that help international students connect with locals. students can also do part time jobs while studying it helps them to maintain their expense.

## REASONS FOR NOT CHOOSING INDIA

Even though India has a number of prestigious institutions that provide quality education and world class facilities the institutes providing bachelors are few and that too in Quantity Surveying. There are a number of private institutes, other than those institutions that are recognized worldwide. Austria is a country which is rich in its culture and beauty. The reason why I chose Austria over India is the quality of education Austria offers . Compared to Austria, India does not have good education facilities.

## FUTURISTIC VISION

I hope to eventually join the worldwide AI community and contribute to developments that will benefit humanity. My goal is to work on artificial intelligence (AI) solutions that enhance decision-making and efficiency in various industries, such as technology, healthcare, and finance. I think JKU Linz is the ideal place to start this adventure because of its innovative research and solid academic environment. I appreciate you taking a look at my application. I'm excited about the chance to develop inside Johannes Kepler University Linz's thriving AI community and make contributions. After completing my undergraduate I would like to work in a famous ai institution and then do a graduate degree in artificial intelligence there by i could get a vibrant future.

## Other hobbies

Apart from my academic interests, I have always been actively involved in sports such as football and cricket. These activities have taught me the value of teamwork, discipline, and perseverance—qualities that I believe will be essential in my academic and professional journey . In addition, I have a keen interest in the financial markets and have spent time investing in the forex market, which has further sharpened my analytical and decision-making skills.

## DECLARATION

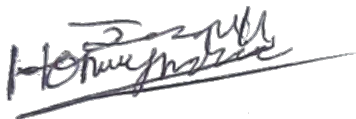

I hereby certify that the above-mentioned information about me is true to the best of my knowledge. I

have provided this information to support my application for studying in Austria and the documents supporting the stated information are also provided along with. And I will strongly adhere to the rules and regulations set by the institute and the laws of Austria during the period of my study.

I request you to consider my application and do the needful.

Yours sincerely,

Honeyndrajith T.R
